Garfield, E. *SCI® Journal Citation Reports®* ; a bibliometric analysis of science journals in the ISI® Data Base. *Science Citation Index®* 1977 Annual, vol. 13 (Philadelphia: Institute for Scientific Information®, 1978).

Preface:
New Features in the 1977 *SCI*®
Journal Citation Reports®

It is a pleasure to announce several important improvements in the 1977 *SCI Journal Citation Reports.*

In the past, each *JCR* ™ annual used data from the previous year. Thus, the 1975 *JCR* was based on journal data from 1974. In the 1977 *JCR,* however, you will find information gathered from journal issues actually published in 1977. This change means that there is no *JCR* covering 1976 journals (the 1976 annual used 1975 data). Another result is that you will now receive in each new *JCR* the most recent journal citation data available.

The second change in the 1977 *JCR* is of equal importance. In previous years, the citation data in *JCR* was derived from the *SCI*® data base, a more than adequate source of information for most science journals. But we were concerned about the presentation of solely these data for journals on or near the border between the sciences and the social sciences. Showing only the citations these journals received from science journals was presenting a partial and even a distorted picture of them. So, beginning with the 1977 *JCR,* citation data on science journals are derived from the combined *Science Citation Index*® */Social Sciences Citation Index*™ data base. The use of citation data from journals in all the sciences gives you a more complete understanding of the universe in which a particular journal operates.

The third improvement is really a major addition to *JCR.* We have always advised caution in comparing journals, especially those in different disciplines, because citation practices vary from field to field. But we did not provide data in *JCR* which would help you understand these citation practices. Beginning with the 1977 *JCR,* we are including a *Source Data Listing in each new annual.* This new listing shows, for every journal covered by *SCI,* the number of source items it published during the coverage period, the total number of references in these items, and the average number of references per source item. By studying these data from journals of interest, you can get insights into varying citation practices among journals in the same field or in different disciplines. Thus, you will be able to take into account an important variable when you are evaluating journals. Introductory material about this new package appears on page 19A.

The fourth change is also an addition. This year we have added approximately 300 clinical journals covered by *Current Contents*® */Clinical Practice* but not by *SCI.* These journals appear for the first time in the *Journal Ranking Package* and as main entries in the *Cited Journal Package.*

The fifth change is an improvement in the typography of the headings of columns of *JCR.* This is not a major alteration, but it should prove helpful as you use *JCR.*

On looking over the data as the *JCR* goes to press, we have noted that the impact factors of certain core journals (for example, *New England Journal of Medicine*) are significantly higher in the 1977 *JCR* than in previous years' editions. This phenomenon is most likely due to the increase in source journal coverage since the last *JCR.* Were our coverage absolutely complete, the impact factor for such journals might be even higher. During the coming year we will be conducting more thorough analyses of 1977 *SCI JCR* data. The results of these studies will be published in *Current Contents*® and in the introduction to the 1978 *SCI JCR.*

Introduction

This introduction describes the nature and purpose of the *SCI® Journal Citation Reports® (JCR™)*. Following it are a selective bibliography on citation analysis and its applications and a list of *Abbreviated-to-Full Titles* of *Citing/Cited Journals*.

I. Journals, References, and Citations

A citation index is based on the principle that there is some meaningful relationship between one paper and some other that it cites or that cites it, and thus between the work of the two authors or two groups of authors who published the papers.

ISI® 's *Science Citation Index®* and *Social Sciences Citation Index™* data bases are stored on magnetic tape, and are thus amenable to extensive manipulation and analysis. In the case of authors, we have been able to identify the frequency with which they and their papers are cited in the literature, over any chosen time period. Counts of this sort are strictly quantitative and objective. But even admitting this limitation, an author's or a paper's frequency of citation has been found to correlate well with professional standing. It is certainly not the *only* measure, nor one that can be used, for any purpose, in isolation. We do not claim for it the absolute reliability that critics of citation analysis have wrongly imputed to us when they have attacked it. The fact does remain, however, that it provides a useful objective criterion previously unavailable.

Basically the same principle can be used in evaluation of journals, rather than of authors' publications or single papers. When a scientist cites a previously published article, he tells us, in a sense, that he has read it and has some reason for bringing it to our attention. The more frequently a journal's articles are cited, the more the world's scientific community implies that it finds the journal to be a carrier of useful information.

Evaluating Journals

It has always been and still remains difficult to assess the relative importance of scientific and technical journals. There have been few, if any, totally objective criteria by which to measure them. Researchers and their library colleagues quickly learn what journals are most 'important' for particular disciplines, and countless studies have been carried out to establish 'core-journal' lists. But as research interest and activity extend beyond the basic discipline, as interdisciplinary and multidisciplinary 'mission-oriented' research requires broader journal coverage, the relevance and usefulness of journals outside the disciplinary core may be difficult to determine. Even within the small disciplinary or departmental library, when a choice between journals is dictated by restricted acquisitions budgets, considerations less relevant than scientific merit may all too likely determine or force the choice—politics, sheer habit, relative subscription cost, and so on.

Thus, the *Journal Citation Reports® (JCR™)* extends the use of citation analysis to examine the relationships among journals rather than among articles and their authors. The *JCR* answers these basic questions: how often has a journal been cited? what journals have cited it? how frequently have *particular* journals cited it? does the cited material in the case of a particular journal come primarily from older articles, newer articles, or does the citation pattern show a chronological consistency? what journals has the particular journal itself cited? how often has it cited each of them? is it citing old material, new material? what part of these counts is due to self-citation? In other words: who uses a particular journal? how frequently? for what purposes?

The Total Framework

Like any other tool, the *SCI JCR* cannot be used indiscriminately. It is a source of highly valuable information, but that information must be used within a total framework proper to the decision to be made, the hypothesis to be examined, and rarely in isolation without consideration of other factors, objective and subjective. For example, there are undoubtedly highly useful journals that are not cited frequently. Scientists read many such journals for the same reason people read newspapers and other non-scientific periodicals—to keep up with what's going on generally. They may rarely cite such journals in their

published work. This does not mean that such uncited or infrequently cited journals are any less useful for their intended purpose than cited journals. It does mean, however, that these journals are written and read for a purpose other than the communication of original research findings and the indispensable summary of research findings provided by reviews.

Another consideration is that citation frequency is sometimes—indeed to some extent must be—a function of variables other than scientific merit. Some such variables may be an author's reputation, the controversiality of subject matter, a journal's circulation and its cost, reprint dissemination, its coverage by current-awareness and indexing and abstracting services, society memberships, the availability and extent of libraries' journal collections, national research priorities.

Compiling Journal Data

Although the *SCI® JCR™* provides citation data about science journals, it is compiled from the *Social Sciences Citation Index™* as well as the *Science Citation Index®* data base.

The use of the combined data bases eliminates the often shadowy boundaries between the sciences and social sciences. Some journals are covered by *SCI* and *SSCI™*; others are covered only by *SCI,* but may also be cited extensively by social sciences journals in the *SSCI* data base. To present a more accurate picture of these journals' citation rates and to include a complete list of the journals which cite them most often, citation data from *SSCI*-only journals are incorporated in the *SCI JCR.*

The 1977 *JCR* is based on 7 million citations from the references of approximately 586,000 articles published in the 1977 issues of some 4,000 *SCI* and *SSCI* source journals.

We have made a reasonable effort to include in this analysis all 1977 issues of journals covered by the *SCI/SSCI* data base. However, to publish a 1977 *JCR* in 1978 it was necessary that all material in this analysis be received by ISI®on or before April 1, 1978.

The combined data bases include the first author, journal title, volume, page, and year of every cited and citing article covered in 1977. *JCR* extracts from the bases several types of information, the most essential being:

- titles and years of science journals cited during 1977 and the titles of the 1977 *SCI* or *SSCI* journals which cited them.
- titles of 1977 *SCI* journals and the titles and years of all journals which they cited during 1977.

JCR counts the similar citation links and tabulates the results in its two "detail" listings, first by citing *SCI* journals and then by cited science journals.

Article-to-Article Links

It is important to remember the way these counts have been generated, as described above. They are counts of reference/citation links, not counts of articles, nor of journals *per se.* For example, a 1975 article published in *Journal of the American Chemical Society* may have had 40 references. These 40 references contained, let us say, citations of only 35 *different* articles. The 35 different cited articles appeared in 10 different journals. In other words, the 40 references cited some articles—at the most 5—more than once, and cited each of the ten different journals an average of 4 times. In compiling the *JCR,* it is the number of different article-to-article links that is counted. In this case the *Journal of the American Chemical Society* is credited with 35 unique references. Their 35 citations will be distributed among the 10 different cited journals, each receiving on the average a 'cited' count of 3.5—not 4, and not 1.

Lest this point be passed over as a laboring of the obvious, the user must remain aware that the *JCR* represents only one of several possible descriptions of journal relationships. Others have been suggested above, namely, one based on data *including* duplicate citation links between the same two articles, and another based on data including only *unique journal* links rather than unique article links between the same two articles.

The Ever-Changing River of Journals

Many users will need no reminder that the management of serials, among which are included scientific journals, is one of the thorniest thickets of bibliography and librarianship. Even knowledgeable estimates of the number of extant scientific and technical periodicals vary so widely—by tens of thousands—that the uninitiated cannot be blamed for doubting the competence of those concerned with the problem.

Like a real river, the river of scientific and technical publication is ever-changing. Its elements are complex, its course confusing, but overall the difficulties and problems of serials librarianship in science are a reflection of the strength and force of its river's progress. Journals die but are replaced by others; journals grow and split into sections (lettered or numbered or subtitled and resubtitled) or into new journals; journals may narrow their interest and merge with other journals under old or new titles; titles change to reflect a reorientation even when splitting and merging is avoided—a few words are added, some dropped, the language of the title itself may change.

This characteristic but vital inconstancy of

scientific publication is severely problematic for an effort like the *JCR*™ that seeks to describe journal relationships over periods of time. There is, to be sure, the additional confusion contributed by incorrect or ambiguous citations, by the sometimes truly stultifying virtuosity of title abbreviators, by the 'separateness' of original and translated versions of the same journal, etc. As irritating and time-wasting as such things are, they are nevertheless of relatively minor significance within the total complex framework. Most are amenable to easy solution, given persistence, generous computer time, and the ability to survive seemingly endless deserts of boredom. (One very soon ceases to wonder at the reason behind some probably reasonable researcher's decision to abbreviate in yet another way the title of the *Comptes Rendus* of the French Academy of Sciences.)

When and When Not to Combine Citation Counts

The user is advised in any detailed chronological study to make use of the cross-references in the annually issued *SCI® Guide and Journal Lists,* and to consult periodical directories that provide historical and genealogical information about serials, such as Ulrich's or *CASSI.*

Compilation of the *JCR* has, as thoroughly as possible, dealt with these 'minor' problems. Major problems of identification remain, however, and the user and researcher must not expect that they have been solved. Any general attempt to do so would have been misguided and inevitably abortive. We have, thus, in compiling the *JCR* refrained from combining journal counts on the basis of 'lineage,' even when it is clearly definable. Except where a title change has been so minor (usually among latter words) that it neither affects the title's position in a catalog listing nor requires additional or different entries, the *JCR* does not combine counts for related journals (replacements, supersedents, continuations, descendants, etc.). Nor does it combine counts for 'sections' of 'the same journal.' *JCR* leaves it to the user to decide whether or not his purpose recommends that counts be combined in such cases.

A particularly well-known example of this problem is that of Soviet journals and their translations. To alert the user, an asterisk after a main entry or subentry abbreviation signals that citation counts for the original and translated versions have been kept separate. Unfortunately it would be impractical to attempt anything similar for the hundreds of journals that are lineally or otherwise related to others in these lists.

Caution!

Caution is advisable in comparing journals, especially journals from different disciplines. The journal literature varies in its importance as a means of disseminating information in different fields. Wide citation may be necessary practice in one field, but a redundancy in another discipline because of other means of dissemination. Citation practices differ from one field to another. The difference may be complicated by a difference in the half-life of journal literature in different fields, as well as the size of the extant citable literature. Rapid obsolescence may characterize one field but not another. Thus, for example, it would be foolish to conclude merely on the basis of citation counts the *Journal of the American Chemical Society* is a 'better' journal than *Annals of Mathematics,* or to hypothesize, without a great deal of study, which serves its own field 'better.'

Other factors must be considered as well. For example, journals that do not use the roman alphabet are not as easily and economically included in the *SCI* data base as those that do. This fact may affect the ranking and citation counts of some Russian and Japanese journals. Or a journal may have published two or three articles that are cited year after year with extraordinary frequency, compared with the 'average' article it has published. Citations of such papers may distort evaluation of the journal unless their records are taken into account.

Introduction

II. Why the *Journal Citation Reports®* ?

In other parts of this introduction I have tried to explain the source of the data in the *SCI®* *JCR™*, to describe how the material has been summarized and displayed in its various sections, and to help the novice use it for the first time. The *JCR* answers the following types of questions immediately: how often has a particular journal been cited? what journals have cited it? how frequently have *particular* journals cited it? is it the older or new material that's being cited? what journals does this journal cite? how often does it cite each of them, etc.?

A merely curious browser, or even students or researchers, may reasonably and bluntly ask *why* these questions should be asked. What is the value of answering these questions? Can it justify a work of the *JCR's* scope and expense? What is the *rationale* of such questions, beyond an academic itch to know? Who wants or needs the answers? Why is it necessary to compare journals or to determine their importance? Doesn't the mere fact that a journal is published say—with unarguable economic authority—all there is to be said? Aren't journals published because they are important to someone or to some group? Unfortunately life isn't that simple.

This introduction is no place to go into the complicated economics and politics of scientific and technical journal publication. The subject deserves several doctoral theses. In due course, the *JCR* will undoubtedly stimulate students to undertake them. Suffice it to say the 'authoritative' voice of economics can speak in barely more than a whisper. Indeed it can often hardly be heard from its shaky podium of subsidized and unsubsidized society sponsorship, front- and back-door government support, voluntary and mandatory and 'mandatory-voluntary' page-charge systems, advertising and public relations programs, etc. The sheer economic chaos of much of this important activity is alone good enough reason to attempt to answer questions like those posed above.

For that very reason, the *JCR* should quickly prove itself indispensable to people who cannot rely on economic criteria alone in making basic decisions about journals, since the law of supply and demand is not always allowed to prevail. These include administrators in libraries and information service centers; individual scientists; journal editors and publishers; and those who determine science policy and measure its accomplishments.

Librarians can use the *JCR* to counteract the inertia that too often prevails with regard to journal selection. It's just too difficult; therefore, *ad hoc* decisions are rampant. The *JCR* offers objective evidence of the optimum makeup of general and special journal collections. Its yearly editions will indicate or imply changes the library should consider. The chronological spread of citation counts should be invaluable in optimizing retention schedules. Why keep twenty-five years of a journal on your shelves when 80 to 90% of its cited material is less than six years old? Few libraries in the world have a mandate to collect everything and none can afford it. Most must operate within a budget on which users' journal requests can wreak havoc. Because the *JCR* gives good indication of a journal's overall use, it provides a starting point for true cost-benefit analysis in allocating acquisition funds.

Outside the library or information center's administration offices, the *JCR* can be as useful to the librarian as to the library user. At ISI® we have found the *JCR* to be the most reliable—sometimes the only reliable—indicator of a journal's subject area, and of its orientation within the subject area. One quick scan of the columns showing journals that it cites and that cite it can often be more informative than the best title or statement of a journal's editorial objectives. This capability of the *JCR* is especially useful as multidisciplinary work takes scientists to the borders of their own fields, and perhaps over them into others with less familiar journals and journals of different types. These same cited and citing lists reveal what journals in other fields are linking up with journals in their own. And, a far from trivial matter, the *JCR* can be very helpful in deciding where to publish to reach the audience you want to reach. If, for example, you have a paper that deals with some interesting mathematical aspects of biological problems but is nevertheless definitely a *biological* paper, the *JCR®* can show you which biological journals have the best 'connections' with math, and which are most likely to welcome the paper.

Since publication of the preliminary 1969 edition of the *SCI JCR* we have had many inquiries from journal publishers and editors. Those inquiries seem to me to speak not only for the potential of the *JCR* but also for the managerial acumen of the scientists and business people who expressed immediate interest in *JCR*. As made plain earlier, the *JCR* cannot be used alone in

evaluating a journal's performance, but it *can* alone give reliable indication that a thorough evaluation—including use of the *JCR*™—may be in order. Has the number of citations dropped in relation to number of articles published? Has the rate of self-citation remained steady at the expected average? How do the self-citing and self-cited rates compare? How are citations distributed among citing journals within and outside the specialty? What is the impact of the average cited article in comparison with other comparably cited journals? How rapidly—see *Immediacy Index* among the *Definitions*—is the journal's material noted in the references of other journals?

The use of the *SCI*® *JCR* can be of far-ranging significance in a field about which I can say least here—science—its planning, its evaluation, its sociology, its history. Citation analysis can be used to identify and map research fronts; to define disciplines and emerging specialties through journal relationships; to determine the interdisciplinary or multidisciplinary character and impact of research programs and projects.[1] I say least about this, to me the most exciting aspect of its potential, because the *JCR* in its present form is, for such advanced applications, only a sketch of that potential, providing little more than suggestions for further and deeper examination of the massive data bank from which its sections have been extracted. I have made plain above my regret that this book has dimensional limits. Even for the generally straightforward lists of ranked and citing and cited journals, we have had to limit the data presented. For the study of science policy and sociology those limitations are more troublesome to me. I believe the *JCR* in its present form can certainly provide material for innovative research in the field. But it will serve the field best if it does, as I hope, prompt more imaginative analyses than I am competent to attempt. I shall be very disappointed if the *JCR* does not, as any good piece of good scientific work should, stimulate with every answer it gives more questions that need answers.

Introduction

III. Definitions

These *Definitions* are, in some cases, actually definitions. In others, they explain usages peculiar to the *SCI*® and *JCR*™ and their editorial conventions. In still others (e.g., *cited journal, citing journal, times cited*), the definition is meant primarily to warn the reader that, in the case of the *JCR*, there is more than initially meets the eye in these apparently obvious terms, and frequently more than the memory instantly discloses. The user will need a fair command of their meaning when reading the discriptions of the *Citing* and *Cited Journal Packages.*

Citation. When one document (B) mentions, or refers to another document (A), the latter (A), has been cited by the former (B) as a source of information, as support for a point of view, as authority for a statement of fact, etc. The word *citation* is used to indicate not only the fact that document A has been cited in a reference of document B, but also for the description of document A contained in the reference (**Lederberg J.** *J. Bact.* 63:399, 1952). In this sense, citation and reference are frequently used interchangeably.

Citation Index. The *Citation Index* is an alphabetic list, by first author, of items cited in references from footnotes or bibliographies of a source article. Each such citation is followed by a short bibliographic description of the source article which contained the citing reference.

Cited Journal. A science journal cited by any journal in the *Science Citation Index*® */Social Sciences Citation Index*™ data base. A cited journal is not necessarily a source journal covered by *SCI* or *SSCI*™. The *Cited Journal Package* may also include as cited 'journals' other non-journal serial publications. Such entries have been retained for their informational value.

Citing Journal. In the *Cited Journal Package* any source journal from the combined *SCI/SSCI* data base. In the *Citing Journal Package* of *JCR*, coverage is limited to science journals covered by *SCI.*

Immediacy Index. A measure of how quickly the 'average cited article' in a particular journal is cited. A journal's immediacy index considers citations made during the year in which the cited items were published. Thus, the 1979 immediacy index of Journal X would be calculated by dividing the number of all journals' 1979 citations of items it published in 1979 by the *total number* of source items it published in 1979. It should be obvious that an article published early in the year has a better chance of being cited than one published later in the year. As a result, journals published weekly and monthly will theoretically have an advantage, as regards immediacy, over journals published quarterly and semi-annually.

Impact Factor. A measure of the frequency with which the 'average cited article' in a journal has been cited in a particular year. The *JCR* impact factor is basically a ratio between citations and citable items published. Thus, the 1979 impact factor of journal X would be calculated by dividing the number of all the *SCI* & *SSCI* source journals' 1979 citations of articles journal X published in 1977 and 1978 by the *total number* of source items it published in 1977 and 1978. There are other ways of calculating journal impact (see **Garfield E.** Citation analysis as a tool in journal evaluation. *Science* **178**:471-79, 1972; especially note 27).

The impact factor is useful in evaluating the significance of absolute citation frequencies. It tends to discount the advantage of large journals over small ones, of frequently issued journals over less frequently issued ones (weeklies *vs.* quarterlies or annuals); of older journals over newer journals. In each such case the first is likely to produce or have produced a larger citable corpus than the second. All things being equal, the larger that corpus, the more often a journal will be cited. The impact factor allows some qualification of quantitative data. The qualification is algorithmic and objective, but nonetheless useful in journal evaluation.

Journal Title. The title of a scientific, technical, or social sciences periodical, usually given in the *JCR*™ in an abbreviated form. Abbreviation of titles in the *JCR* usually ignores subtitles and the title run-ons (Acta medica clinica—*an international journal of medical practice.* Zeitschrift für Neurologische Forschung *und Angewandte Gebiete*). In alphabetic listing of journals, abbreviations are alphabetized letter by letter, with

a space regarded as a 'letter' preceding *A* and a hyphen as a 'letter' following *Z*. In such alphabetic listings of 'journal titles' in the *SCI*® *JCR*™, note that it is the *abbreviation, not the full journal title,* that is alphabetized. An *Abbreviated-to-Full Titles of Citing/Cited Journals* list begins on page 49A.

Reference. The mention or description of one document (A) in another document (B), to indicate a source of information, to provide support for a point of view, to lend authority to some statement of fact, etc. Document B is said to make reference to document A; document A is said to be cited by document B. *Reference* is also used for the document description or bibliographic data given in making the reference (**Lederberg J.** *J. Bact.* **63**:399, 1952). Reference is made, that is, references are given, in footnotes, and more frequently among bibliographic endnotes or in bibliographic listings at the end of an article. From such references are extracted the *citations* which become main-entries in the *Citation index.*

Rest. A column heading in the *Citing* and *Cited Journal Packages* of the *JCR,* used to mean 'Total Citations of Articles Published in All Previous Years.' Since the format of the *JCR* allows a chronological distribution of citation dates over a ten-year period, *Rest* means 'published prior to the decade just ended.'

Self-Citation. Self-citation of journals occurs when an article in journal X cites another article previously or simultaneously published in journal X. Self-citations are contained in about 20% of a journal's references.

Self-Citation Rate. Self-citations expressed as a percentage of all citations. There are *two* self-citation rates, the self-cit*ing* and self-cit*ed* rates. The self-citing rate relates a journal's self-citation to its total references. The self-cited rate relates a journal's self-citations to the number of times it is cited by all journals including itself. For example journal X made reference to 10000 items, including 2000 items it itself had published. Its self-cit*ing* rate is 2/10 or 20%. On the other hand, journal X was cited 15000 times in the references of all journals, including its own. Its self-cit*ed* rate is 2/15 or 13.5%.

Source Index. The *Source Index* of the *SCI*® or *SSCI*™ gives a complete bibliographic description of all source items processed for the *SCI* or *SSCI.* Items are arranged alphabetically by name of first author; all coauthors are cross-referenced to first authors. The *Source Index* is, thus, an alphabetic index by author of all items published by *SCI*- or *SSCI*-covered journals during a particular year.

Source Item. Called also source document and source article, a source item is an item published in one of the source journals processed for the *Science Citation Index*® *(SCI)* or the *Social Sciences Citation Index*™. Source items may be original substantive articles, editorials, letters, technical notes, correction notes, meeting reports, reviews, etc. From the references provided by a soure item, citations are extracted to prepare the *Citation Index* of the *SCI* or *SSCI;* bibliographic descriptions of source items are prepared for the *Source Index;* and words from the titles of source items are paired for production of the *Permuterm*® *Subject Index* of the *SCI* or *SSCI.*

Some types of source items (e.g., news items, non-scientific and non-technical correspondence) do not by their very nature invite citation in the references of scientific reports. Such source items are excluded from source-item counts in compilation of the *JCR*™. In the *JCR* only original articles, technical notes and review articles are counted as source items, except in the case of the following journals, whose meeting abstracts are admitted as source items in impact-factor and immediacy-index calculation: *Federation Proceedings, Bulletin of the American Physical Society, Clinical Research, Transactions of the American Nuclear Society, Notices of the American Mathematical Society* and *EOS—Transactions of the American Geophysical Union.*

Source Journal. A journal that is processed for the *SCI*® or *SSCI*™, so called because it is the source of published items processed for compilation of the three sections of the *SCI* or *SSCI.* In the *JCR* a source journal is a *citing* journal.

Times Cited. The *JCR* describes relationships between journals. It is, however, based on citation links between articles. The following explanations of 'times cited' may be unnecessary for most users. Some, however, may need the information, and it is given in some detail in the interest of whatever differentiation research may require.

Times Cited: Authors. In the case of authors, 'times cited' is the sum of the citation of their cited items, as described below, including journal articles, books, etc.

Times Cited: Journals. In the case of journals, 'times cited' is based on citations of articles, as described below. It is a cumulation of the number of times a particular journal has been named in citation of different articles in references of individual source items.

Times Cited: Articles. As elsewhere in these definitions, the term *articles* is used broadly for 'journal items,' and includes technical communications, letters to the editor, editorials, etc.; in other words, individual items published in journals. An article cited three times in the references of the same *SCI* source item is counted as having been cited by that source item *once*. Thus, 'times cited' in the case of articles is the cumulative number of times the article has been cited once or more by single source items. In the case of articles, therefore, 'times cited' is equivalent to the number of source items that have cited the article.

Times Cited: Books and Other 'Non-Journal' Items. The references of journal items contain citations of many different types of publications. About 80% of the references cite other journal items. The remaining 20% cite books (single- or multi-authored monographs); edited collections of single- or multi-authored 'contributions' or 'chapters' or 'sections'; variously compiled and formatted collations of reports and papers produced by meetings, symposia, congresses; technical reports of academic, industrial, and governmental origin; personal communications; items in press; theses; 'unpublished' reports; collected works of classical and modern authors; hand-books, textbooks, data compilations; encyclopedias and other reference works; etc.

A great deal of such material presents problems for citation analysis that the journal article does not. First, styles of citation vary widely and wildly. Second, internal citation (of a single page, series of pages, section, chapter, etc.) is particularly frequent. Third, different revisions or editions, by the same author(s) or by the same or different editor(s), may be cited.

"Non-journal" items cited more than once in the references of the same source item are subject to certain ISI® conventions. For example, if a book is cited identically several times or if the only differences in its citations are page and chapter numbers, the book is counted as having been cited once. However, if two (or more) *editions* or *revisions* of the book are cited, the book is counted as having been cited two (or more) times.

Introduction

IV. Components of the *JCR*™

The *JCR* is made up of four data 'packages' or sections. The four sections are: (1) *Journal Ranking Package;* (2) *Source Data Listing;* (3) *Citing Journal Package;* and (4) *Cited Journal Package.*

The first section (*Journal Ranking Package*) lists alphabetically science journals cited by *Science Citation Index*® and *Social Sciences Citation Index* ™ journals. They are then ranked by five different counts or indicators. In addition, an alphabetical list of those social sciences journals cited by the combined *SCI*® */SSCI* ™ data base is included in this package.

The second section *(Source Data Listing)* shows the number of articles published by each *SCI* source journal. It also includes the average number of references in review and "non-review" articles published in these journals in 1977.

The third section (*Citing Journal Package*) shows, for each *SCI* source journal, the journals it cited in 1977, and the chronological spread of items cited.

The fourth section (*Cited Journal Package*) shows, for science journals cited by *Science Citation Index* and *Social Sciences Citation Index* journals, the citing journals and the chronological spread of items cited.

Each of these sections is described more fully in the material which follows.

The Journal Ranking Package

The first part of the *JCR* is the *Journal Ranking Package.* It contains seven listings, described in detail on pages 14A-18A. The first listing is an alphabetic list of journals cited in the 1977 references of science journals processed for the production of the *Science Citation Index*® and the *Social Sciences Citation Index*™. The next five listings rank the cited journals by various counts and indicators. The seventh listing is an alphabetical list of *social sciences* journals cited by *SCI*® */SSCI*™ source journals.

The ranking lists present a great deal of useful information. Some of it is a summing of counts of references made and citations received that are broken down by cited journal and by citing journal in the two larger parts of the *JCR.* Some of the information is presented only in these lists, for example, the number of source items published in the years 1975, 1976, and 1977 by each of the cited journals. It can be somewhat difficult initially to understand the calculation of impact factor and immediacy index, as defined in the *Definitions* elsewhere in this introduction. The summing of counts presented in the *Journal Ranking Package* gives the counts involved in the calculation of both, along with the result. Impact factor is the result of dividing the count in the fourth column of figures by the count in the seventh column. Immediacy index is the result of dividing the count in the next-to-last numerical column by the number on its left.

The fact that there are several ranking lists will, I hope, serve to remind users that ranking journals by any single criterion can be highly useful. But the result must be used with caution, and not in isolation without consideration of other rankings and other factors which may not be susceptible to any kind of ranking or any kind of objective, especially algorithmic comparison. Not unnecessarily, this advice of due caution is repeated elsewhere in this introduction, and in much that the author has written on the subject. The user must remember that *rank* in the *JCR* indicates relative standing on certain lists, and that the *JCR* is, among other things, a *tool for* evaluation of journals, not itself an evaluation of journals.

Description

Section 1 is a listing of science journals cited in the references of *Science Citation Index*® and *Social Sciences Citation Index*™ source journals. The journals are arranged in alphabetical order by abbreviated title. The first column contains sequence numbers; the second, the journal-title abbreviation. The next four columns, bracketed under the heading, '——Citations in 1977 to——,' give:

(1) the total number of times the journal was cited by individual *SCI*® and *SSCI*™ source items during 1977;

(2) the portion of those total citations accounted for by articles the journal published in 1976;

(3) the portion of the total citations accounted for by articles the journal published in 1975; and

(4) the sum of citations in 1977 to items published in 1976 and 1975. This is simply the sum of the two previous columns.

The next three columns, bracketed under the heading, '——Source items in——', give

(1) the number of source items published by the journal in 1976;

(2) in 1975; and

(3) in both years.

The next column, headed 'Impact Factor', gives a figure for the relative frequency with which the journal's 'average article' has been cited. (See *Impact Factor* under *Definitions.*) Briefly, the impact factor is the ratio of citations to citable items published: all journals' 1977 citations of 1975 and 1976 items published by journal X, divided by the total number of source items published in 1975 and 1976 by journal X.

The next two columns show, respectively, the number of times articles in the journal's 1977 issues were cited in the references of *Science Citation Index®* and *Social Sciences Citation Index* source items for the same period; and the number of source items the journal itself published that year. The last column, headed 'Immediacy Index', (see that term under *Definitions*) is the result of dividing citations of 1977 articles by source items published in 1977.

Thus, we see that *Acta Anaesthesiologica Scandinavica* was cited by *SCI/SSCI* source journals 638 times in 1977. Of these 638 citations, 137 were to articles published in 1975 and 1976 issues of *Acta Anaesthesiologica Scandinavica.* In 1976 that journal published 60 source items, in 1975, 88. The impact factor is therefore 137/148, or 0.926. In 1977, *Acta Anaesthesiologica Scandinavica* published 87 articles, to which there were, *during 1977,* 98 citations. Thus, the immediacy index is 98/87 or 1.126.

It should be remembered that the journals which appear in the *Journal Ranking Package* include not only *SCI®* source journals, but also other science journals cited in the *SCI/SSCI™* data base. Among the journals listed here for the first time this year are some 300 clinical journals not indexed by *SCI,* but covered by ISI's current awareness publication, *Current Contents® /Clinical Practice.* In most cases, we have been able to supply the information that is needed on items to fill out the entries for cited journals not covered by the *SCI.* Where we have not, a small bullet (●) appears.

There will always be a citation count in the first column unless the journal has never been cited. And a zero in the second to fourth columns under '——Citations in 1977 to——' is a true zero. *Acta Chirurgiae Plasticae,* for example, was cited 53 times in 1977. The citations were to articles published in some years other than 1976 and 1975. So the three columns for those two years' citations (and their sum) show zeros. The impact factor is therefore zero. In future *JCR* editions we intend to calculate impact based on longer periods.

Zeros in the second group of columns headed '——Source Items In——' usually indicate that the journal is no longer published or is no longer published under that title. For example, *Acta Crystallographica* was cited 6704 times in 1977. Of those citations, 30 were supposedly citations of articles published by 'Acta Crystallographica' in 1975 and 1976. As the reader may know, however, the former *Acta Crystallographica* had in 1972 split into separate A and B sections. Counts for those journals immediately follow the entry for the former title. As shown, 'Acta Crystallographica' published nothing in 1975, 1976, or in 1977, but incomplete citations in 1977 references of some journals failed to identify which of the A or B sections was meant. The original title is still highly cited, but cannot be given either impact factor or immediacy index. Both are given for the A and B sections in the entries below. The journal origin of the 41 incomplete citations can be partially determined by consulting the *Cited Journal Package.*

As an alert for the user, an asterisk following the abbreviation of journals (usually Russian) reminds the user that citation counts for the translated and original versions have been kept separate.

Description

In Section 1 of the *Journal Ranking Package,* cited journals are listed alphabetically by journal title abbreviation. In Sections 2-6, cited journals are rearranged in descending numerical order of counts or indicators in various columns, as follows:

Section 2. By total citations for all years

Section 3. By impact factor

Section 4. By immediacy index

Section 5. By source items published in 1977

Section 6. By number of citations to 1975 and 1976 articles in 1977 issues of *SCI® /SSCI™* source journals

In Sections 2-6, the first column is a 'rank' number. In these sections, journals will have the same rank number when they show the same number or value for the count or indicator that has determined the ordering of the entries. After one or more repetitions of a rank number, the next lower rank number is advanced as many times as necessary to compensate for the repetition(s). Thus, if two journals both ranked *47th* in terms of impact factor in Section 3, the next journal on the list would rank *49th.*

Once familiar with the *JCR™* and its potential in journal evaluation, readers will find they want information about particular journals from several or all of the lists in Sections 2-6 of the *Journal Ranking Package.* To find the rank of a particular journal on any of the lists, look it up in the alphabetic list. Determine the count or indicator in the column by which you want the journal ranked, turn to the indicated Section of the *Journal Ranking Package,* and run down the relevant column until you find the journal's count or indicator. One can of course work from any one of the Sections to any other in this manner, without beginning with the alphabetic listing in Section 1.

For example, in the alphabetical list of Section 1, *Science* is number 2532. From that list, we find that it was cited 55,990 times in 1977. Turning to Section 2, we do not have to go far down the first numerical column to find 55,990; *Science* ranks 7th. Scanning across the row to the impact factor column, we find a value of 5.745. Turning to Section 3, we scan barely half a page to find 5.745 and *Science,* with an impact factor rank of 53. Jumping across to the immediacy index column, we find a value of 1.142. Turning to Section 4, we find *Science* ranks 31st in immediacy. It published 1060 source items in 1977; turning to Section 5, we find it ranked 14th in this respect. In the fourth numerical column of Section 5, we find that *Science* articles published in 1975 and 1976 were cited 10,789 times in 1977. Turning to Section 6, we find *Science* ranking seventh.

Readers are invited to submit notice of errors of omission or commission to:

Description

Section 7 is a listing of social sciences journals cited in the references of *SCI® /SSCI ™* source journals in 1977. The journals are arranged in alphabetical order by abbreviated title. The format is exactly the same as that of Section 1 of the *Journal Ranking Package.*

The social sciences journals listed here are those which have been indexed by the *Social Sciences Citation Index™*. Also listed are certain highly-cited 'non-journal' publications: *Dissertation Abstracts, Federal Register, The New York Times, Newsweek, Time, The Times—London, The Wall Street Journal,* and *The Washington Post.*

This list provides users of *SCI JCR™* with additional information about social sciences journals. Readers who wish to obtain more citation data about these journals should consult ISI's new *SSCI Journal Citation Reports®* . Like the *SCI JCR,* the *SSCI JCR* includes four data packages *(Journal Ranking Package, Source Data List, Citing Journal Package,* and *Cited Journal Package)* for social sciences journals. The *SSCI JCR* will be part of the *Social Sciences Citation Index* annual each year.

SOURCE DATA LISTING

The second part of the *JCR*™ is the *Source Data Listing* which lists alphabetially the journals covered by the *Science Citation Index*® with corresponding details on the number of articles published in those journals in 1977, the number of references contained in those articles collectively, and the average number of references per article in each journal. An indication of the number of those articles which are review articles and their reference counts is also provided.

This package permits you to gather information about an important variation to be considered in a citation analysis: the variation in the number of references per journal article in different scientific disciplines.

An awareness of this variable is important because the average number of references per article is a determinant in measuring impact. Thus in a field like biochemistry where the average number of references is now about 30 per article, the expected impact is higher than for mathematics where the average is about ten.

If you did not have this information about the citation practices in these fields and looked only at the total number of citations received, you might conclude falsely that journals in field A were somehow 'better' than those in field B. By using the information in the *Source Data Listing*, you can avoid this type of misjudgment when you are comparing journals.

The *Source Data Listing* not only shows the ratio of references to all articles published by the journal, it also gives you the average number of references in each 'non-review' article (an article reporting original research, or a technical note) and in each review article published by the journal. The listing for review articles serves an important purpose: it permits you to see which journals published reviews and how many they print annually. Since a good review article is likely to be highly cited, the publication of reviews should increase the total citations a journal receives. A journal that publishes reviews regularly will probably be more highly cited than one which prints only original research articles. This factor should be taken into account in any citation analysis comparing journals.

The number of review articles published by each journal in the *Source Data Listing* is determined by a code assigned to review articles when they are processed for the *Science Citation Index*. Articles receive this code if they have more than 100 references, if they appear in publications devoted solely to the review literature, or if they appear in the review sections of periodicals. Articles are also coded as reviews if they have the word "Review" or "Overview" in their titles or if the summary of the article states that it is a review or a survey. Bibliographies are given the same code as reviews, and so are included in the figures for review articles in the *Source Data Listing*.

Description

The *Source Data Listing* is a listing of the source journals covered by the *SCI* in 1977. The journals are arranged in alphabetical order by abbreviated title. The first column is the list of journal-title abbreviations. The next three columns, bracketed under the heading '——Non-Review Articles——,' give:

(1) the total number of non-review articles published in the journal in 1977;

(2) the total number of references contained in these articles; and

(3) the average number of references per non-review articles in 1977.

The next three columns, bracketed under the heading '——Review Articles——,' give:

(1) the total number of review articles published in the journal in 1977;

(2) the total number of references contained in these reviews; and

(3) the average number of references per review article in 1977.

The final three columns, under the heading 'Combined Total Non-Review & Review,' give:

(1) the total number of articles (review and non-review) published in the journal in 1977;

(2) the total number of references contained in these articles; and

(3) the average number of references per article in 1977.

Thus, you can see in the specimen that in 1977 *Acta Anaesthesiologica Scandinavica* (ACTA ANAESTH SCAND) published 84 'non-review' articles (articles reporting original research). These articles contained a total of 1999 references. The average number of references per non-review article was 23.7 (1999/84).

During 1977, ACTA ANAESTH SCAND also published three review articles which contained a total of 333 references. The average number of references per review article was thus 111.0 (333/3).

Altogether then ACTA ANAESTH SCAND published 87 articles which contained a total of 2332 references. The average number of references in all articles published in ACTA ANAESTH SCAND was thus 26.8 (2332/87).

Many journals do not publish any review articles. Therefore, the zeros in the columns of the *Source Data Listing* are true zeros.

You will note some difference between the number of citations from a given journal in the *Citing Journal Package* and the number of references reported in the *Source Data Listing*. There are two reasons for this: 1) In the *Source Data Listing* only references from articles, notes and reviews are counted (see p. 19A). 2) In the *Citing Journal Package* references, excluding patents, from all source items are counted.

The Citing and Cited Journal Packages

The *Citing* and *Cited Journal Packages* show citation-frequency relationships between pairs of journals. In the *Citing Journal Package,* one can find what journals a particular journal has cited, and a distribution by year of the publication dates of the cited material. In the *Cited Journal Package* one can find what journals have cited a particular journal, and a distribution by year of the publication dates of the cited material. Specimens with descriptions from both appear on pages 24A-27A.

Relatively few journals produce most of the references processed at ISI®. Similarly, relatively few journals account for most of the citations made in those references. In either case, a list of 1000 journals will encompass well over 70% of the items. Beyond lists of 1000 journals, the 'return' in references and citations becomes progressively smaller as the lists are extended, but that return can be valuable for the information it gives about 'narrow' but important specialties and sub-specialties in which journals may be few, publication infrequent, research relatively slow-paced, and so on.

Ratios like the *JCR*™'s impact factor and immediacy index do much to compensate for sheer size in 'comparing' one journal in biochemistry with another, for example, or in 'comparing' a biochemistry journal to a palaeontology journal. But even with the help of such indices, we must extend the lists of citing and cited journals well beyond the select but gigantic core if we are to do justice to as many of the 'narrower' fields and subspecialties and border-marches of science as possible.

The *Citing Journal Package* includes entries for each of the more than 2,500 journals covered by the *SCI*® in 1977, provided that issues of the journal did appear during the year. The *Cited Journal Package* includes entries for more than 2,800 journals, some of them obviously not covered by the *SCI.* As noted above, journal references contain citations of other items besides journal articles. As far as possible, citations of non-journal material have been deleted in compiling the *JCR.* Cited subentry items in the *Citing Journal Package* and main entries in the *Cited Journal Package* will therefore, be *journals* in almost all cases.

It would have been uneconomical to give, for every citing journal all the journals it had cited, and for every cited journal, all the journals that had cited it. To do so would have made this volume many times its present size, but would have added to it in either case mainly long strings of singly cited or citing items under every main entry. To avoid the latter, but at the same time to avoid neglect of journal relationships in 'smaller' and 'narrower' fields, the length of subentry lists has been controlled in both the *Citing* and *Cited Journal Package.*

The following algorithm has been adopted to control the length of subentry lists. Subentry lists of cited or citing journals are limited to a maximum of 100 items, or to the number of items that account for 75% of the total references or citations. Where either condition would allow listing of items cited or citing less than 6 times in the year, the items are not printed as subentries but are incorporated in the ALL OTHER subentry, the last subentry under each main entry. Disregarding these conditions, at least six subentries in addition to the ALL OTHER subentry *must* be printed, if the main entry journal can supply them.

Complete citing and cited data on all the listed journals are available on magnetic tape for users whose research requires it. Inquiries should be directed to the Research and Corporate Development Division, Institute for Scientific Information®, 325 Chestnut Street, Philadelphia, Pa., 19106, USA.

Main entries in the *Citing* and *Cited Journal Packages* are arranged alphabetically by journal title abbreviation. As mentioned elsewhere, consistency in abbreviation of journal title words has been subordinated to informativeness. The same word may not be abbreviated in the same way whenever it occurs. The reader can 'decode' any abbreviations that may leave him in doubt by referring to the *Abbreviated-to-Full Titles Of Citing/Cited Journals* list beginning on page 49A.

DESCRIPTION

Citing journals (journals indexed by *SCI*® during 1977) are listed alphabetically by their abbreviated titles. The first line of the entry for each citing journal gives its impact factor, abbreviated title, and total number of references from articles the journal published in 1977. The total is asterisked. Succeeding columns of the row distribute the reference total by year in which the articles cited in the references were published. The last column includes counts for 1967 and previous years.

Thus, the specimen shows that articles published by the *Journal of the American Statistical Association* in 1977 produced 2246 unique citations (citations of the same article in a single article's references are counted as one). Twenty-six of the 2246 references contained citations of articles published in 1977, 178 references cited articles published in 1976, 200 references cited articles published in 1975, etc. The last column in the row shows that 747 of the 2246 references contained citations of material published in 1967 and earlier years.

Under the total line for each citing journal are listed the journals cited in the references of the citing journal named in the main-entry line. These cited journals are listed, in descending numerical order, by the frequency of their citation in references of the citing journal named in the main-entry total line. The abbreviated title of each of the sub-entry cited journals is preceded by the impact factor of that journal if it has been possible to determine it. The total citation count for each sub-entry cited journal is shown, and then distributed, as described above, by year of publication of the cited items.

Thus, *Journal of the American Statistical Association* (J AM STAT ASSOC) cited itself 302 times in the reference of articles it published in 1977. Of those 302 citations, eight were of articles published in 1977, 29 of articles published in 1976, 33 of articles publshed in 1975, etc. Eighty-eight of the 302 citations were articles published in 1967 and earlier years. Similarly, *Journal of the American Statistical Association* cited *Biometrika* 145 times in the references of articles it published in 1977. None of these references contained citations of articles published in *Biometrika* in 1977; five contained citations to articles published in 1976. The chronological distribution shows that nearly one-half (77/145) of *Journal of the American Statistical Association*'s citations of *Biometrika* was of material published by *Biometrika* in 1967 and earlier years.

The last sub-entry under each citing journal main-entry summarizes data on journals that were cited less than 6 times in the references of articles published in 1977 by the journal named in the main-entry line. (Exceptions to the 'less-than-six' convention are explained elsewhere.)

Thus, 'all other' journals cited in the 1977 references of J AM STAT ASSOC numbered 654, and these unnamed journals accounted for 955 citations.

This specimen shows that about one-third (747/2246) of the articles cited in 1977 references of J AM STAT ASSOC were published in 1967 and earlier years, that its self-citing rate is 13.4% (302/2246), and that 35.4% (796/2246) of the articles it cited in 1977 were published in 1973 or thereafter.

Description

Cited journals in this package are science journals cited by *SCI*® and *SSCI* ™ source journals. Not every cited journal is covered by *SCI*. In fact, about 300 cited journals are those not indexed by *SCI* but covered in ISI's current awareness services, *Current Contents*® */Clinical Practice*. References from these *CC*®*/CP* journals were not processed for the *SCI* and thus citations from them, including self-citations, were not available when *JCR* was compiled.

Cited journals are listed in alphabetical order of their abbreviated titles. Thus, in the specimen, the entry for *American Journal of Physics* (AM J PHYS) comes before the entry for *American Journal of Physical Anthropology* (AM J PHYS ANTHROPOL). The first line of the entry for each cited journal gives its impact factor, abbreviated title, and total citations received in 1977. The total is asterisked. Succeeding columns of the row distribute the citation total by year in which the cited articles were published. The last column includes counts for 1967 and previous years.

Thus, the specimen shows that *American Journal of Physics (AJP)* was cited 1049 times in 1977. Twenty-nine of the citations were to articles or other items published by *AJP* in 1977, 123 to articles published in 1976, 101 to articles published in 1975, etc. Of the 1049 citations, 345 were of articles published by *AJP* in 1967 and earlier years.

Under the total line for each cited journal are listed the journals in whose references citations of the main-entry cited journal appeared. These citing journals are listed, in descending numerical order, by the number of citations each contributed to the citation totals for the cited journal named in the main-entry. The abbreviation for each of the sub-entry citing journals is preceded by the impact factor of that journal, if it has been possible to determine it. The total citation count for each sub-entry citing journal is shown, and then distributed, as described above, by year of publication of cited *AJP* items.

Thus, *American Journal of Physics (AJP)* cited itself 414 times in references of articles it published in 1977. Seventeen of these references contained citations of articles published by *AJP* in 1977; 77 of the 1977 references cited 1976 *AJP* articles, and so on. Similarly, *Foundations of Physics* (FOUND PHYS) cited *AJP* 28 times in references of articles it published in 1977. None of these references were to *AJP* articles published in 1976 or 1977. One was to an article published in 1975, four cited 1974 articles, etc. Eleven of the *AJP* articles cited by FOUND PHYS were published in 1967 or earlier years.

The last sub-entry under each cited journal main-entry summarizes data on journals whose 1977 references included fewer than six citations of *AJP* in 1977. (Exceptions to this 'less-than-six' convention are explained elsewhere.) Thus, 'all other' journals whose 1977 references contained citations of *AJP* numbered 193. These 193 journals contained in all 331 citations of *AJP* articles in their references. The total for these 'all other' journals is distributed chronologically, as described for named citing journals.

This specimen shows *AJP* has a self-cited rate of 39.5% (414/1049); that 32.9% (345/1049) of 1977 citations of *AJP* were citations of older material published in 1967 and earlier years, and that 35.7% (345/1049) of 1977 citations were to articles published from 1973 on.

The specimen opposite also shows several features users will soon understand at a glance. Notice, for example, the entry for BIOCHEM Z. BIOCHEM Z was cited 1,965 times. It shows no impact factor and practically no counts for cited items published in 1968 or after. In fact, *Biochemische Zeitschrift* ceased publication with issue 5 of volume 346 in January 1967. it was superseded by *European Journal of Biochemistry*. The four counts for cited items published after 1967 are the result of authors' incorrect references.

ANN CLIN LAB SCI *(Annals of Clinical and Laboratory Science)* began publication in 1971—hence the zeros in the far right-hand columns. An array of zeros on the right should alert you to the fact that a journal is relatively new.

Significant journals of science

Eugene Garfield

Institute for Scientific Information,
Philadelphia, Pennsylvania 19106.

In 1974 the Science Citation Index (SCI) *covered about 401,000 articles and communications in 2,443 scientific and technical journals. They cited about 3.2 million different publications an average of 1.8 times each. In this article some results of an analysis of more than 5 million citations in the references of journal articles indexed for the* SCI *in 1974 are presented and an attempt is made to interpret those results in the light of an earlier study of 1969 citations.*

THE basic information recorded in the *SCI* for citing and cited papers is a "condensed citation." It gives first author, year, journal, volume, and page. The citing–cited pairs can be sorted and subsorted in various ways, as one's interests dictate. Sorting by cited author produces the *Citation Index* section of the *SCI*. Sorting by citing and cited journals produces the two major sections of the *Journal Citation Reports* (*JCR*).

ISI's *Journal Citation Reports* is an index of journal–journal links based on a grouping and summation of condensed citations using journal rather than author as the primary sorting key. A preliminary *JCR*, based on an analysis of 1969 references[1], appeared in 1972[2]. This year the *JCR* became a regular section and volume of the *SCI*[3]. It is the source of the 1974 citation data discussed here.

In this report I have used two indicators of journal significance: total citations and impact. The first is simply the number of times a journal was cited in 1974. Impact, on the other hand, is a measure of the relationship between citations and articles published. For this report, impact was calculated by dividing the number of 1974 citations of 1972 and 1973 articles by the number of articles published in 1972 and 1973. For example, the 817 articles published in 1972 and 1973 in the *Journal of Molecular Biology* were cited 6,129 times in 1974. The impact of the journal is therefore 7.502.

Fig. 1(*a*) lists the 206 journals most cited in 1974. Fig. 1(*b*) lists an additional 78 journals whose 1972 and 1973 articles only—rather than articles of any and all years, as in Fig. 1(*a*)—were highly cited in 1974. (The total of 284 journals in Fig. 1(*a*) and (*b*) corresponds to the number of journals listed in Fig. 2(*a*) and (*b*), which have impacts greater than 2.) In most cases (63%) these journals began publication in the 1960s and 70s. Older journals like the *Comptes Rendus* rank well in Fig. 1(*a*), mainly because there is so much that can be cited. Fig. 1(*b*) is a needed supplement to the list in Fig. 1(*a*), since the journals have high current citation but lack historical mass to push them up into the top of a list ranked by total citations.

Figures 2(*a*) and (*b*) show the 284 journals with impacts greater than 2. Fig. 2(*a*) lists 206 primary journals. Fig. 2(*b*) lists 78 review journals; the impact of review journals is generally higher than that of primary journals.

Figure 3 lists journals that rank highest in citation and impact for three specialities: mathematics, botany, and astronomy/astrophysics. The differences in average impact and citation between the three illustrative categories indicate why comparisons between journals in different specialities may be invidious. For example, it would be foolish to conclude merely on the basis of citation counts that *Astrophysical Journal* is a "better" journal than *Annals of Mathematics*, or to hypothesise without a great deal of study which serves its own field "better."

Variation from field to field is determined by the interplay of several factors. Perhaps the most important is the average number of references per paper in the field[4]. In general, mathematicians cite less than half as many papers as do biochemists. Engineers on the other hand cite books as heavily as journals, as do social scientists. Furthermore, calculation of impact based on 1972 and 1973 publications is bound to affect the impact of journals in a field like mathematics, where citation of older literature is far more common than in others. Thus, the impact of mathematics journals would be higher if calculated on the basis of 1970 and 1971 publications.

It seems necessary to point out the obvious, as I have done in preparing Fig. 3, because one short-sighted criticism of the *JCR* has been that its listings and rankings are undiscriminating. One can get from the *JCR* information on journals within disciplines for intradisciplinary comparison. None of the mathematics journals listed in Fig. 3 was cited enough to appear in Fig. 1(*a*), but the citation counts and impact factors show plainly that the two leading mathematics journals are *Transactions of the American Mathematical Society* (on the basis of total citations) and *Acta Mathematica* (on the basis of impact). In both citation and impact the average mathematics journal ranks lower than the average astronomy or botany journal.

If one wishes to add to a general-science collection the two or three leading journals of mathematics, botany, or astronomy/astrophysics, one must examine longer lists and select from them the top journals in each speciality, as I have done in preparing Fig. 3.

The remarkable stability of the significant journals of science is attested by their continued high citation and impact. Of the 206 journals most cited in 1969, 169 remain among the top 206 in 1974. One may regard the changes as the result of healthy competition. The 37 journals that dropped from the 206 most cited between 1969 and 1974 rank between 224 and 426 in the complete listing that appears in the *JCR*[5].

Fig. 1*a*, Journals most highly cited in 1974. Journals are listed in descending numerical order of total citations in the references of 1974 issues of journals processed for the *Science Citation Index*. A: rank in terms of total 1974 citations. B: rank in terms of total 1969 citations. C: total 1974 citations. D: 1974 impact. E: total 1974 citations of 1972 and 1973 articles. F: rank in terms of 1974 citations of 1972 and 1973 articles. An asterisk before a journal title indicates that counts for sections, retitled continuations, translated versions, and so on, have been combined with those for the original; the number in parentheses after the journal title indicates the number of such sections, and so on, that went into the combination, including the original. *b*, Journals whose 1972 and 1973 articles were highly cited in 1974. Journals are listed in descending numerical order of total 1974 citations of their 1972 and 1973 articles. Journals ranking higher in this respect will be found among the journals listed in Fig. 1*a*. See the legend of Fig. 1*a* for significance of the column markers. An asterisk before a journal title indicates that counts for sections, retitled continuations, translated versions, etc., have been combined with those for the original; the number in parentheses after the journal title indicates the number of such sections, etc., that went into the combination, including the original. The date of a journal's inauguration follows its title.

Perhaps the point to be stressed in presenting these data is the bibliographic law of concentration[6]. When the *SCI* was first reviewed in *Nature* more than a decade ago[7], the scope of its journal coverage was called into question. I believe time has shown beyond doubt that the important literature of science is encompassed by fewer than 1,000 journals. And even fewer account for the truly significant. Of some 45,000 serials of all kinds received by the British Lending Library, two-thirds are rarely, if ever, subject of request. A small core of about 5,000 accounts for almost 80% of all requests[8].

Fig. 2 *a*, High-impact journals in 1974 (excluding review journals). Journals are listed in descending numerical order of 1974 impact factor. *b*, High-impact review journals. A: rank in terms of 1974 impact; B: 1974 impact; C: 1969 impact; D: total 1974 citations of 1972 and 1973 articles; E: total number of 1972 and 1973 articles.

In using the data presented here, one should be aware that we revised our definition of "source items" used to calculate impacts. In 1969 we included as source items much material (editorials, non-scientific and non-technical correspondence, news notes, and so on) that does not by its very nature invite citation in scientific and technical reports. This policy worked to the disadvantage of some major journals. Our redefinition accounts in part for the changed impact in 1974 of journals like *Nature, Science, Lancet, Journal of the American Medical Association,* and *British Medical Journal.*

What is the significance of journal impact? By demonstrating that only 150 journals have impacts greater than 3, I believe we have established the futility of discussions based on the assumption that the average library must acquire and store thousands of journals. Since the average impact in 1974 was 1.015, any of the journals listed in the figures is likely to be a good candidate for selection.

Fig. 2(*b*) shows clearly the importance of review journals, confirming our earlier studies. Their extraordinary impact, along with a surge in the number of review-type articles and publications, led to ISI's decision to publish *Index to Scientific Reviews*[9].

Clearly, a large part of the scientific record is of low impact. Only careful study can show whether this fact

Fig. 3 Significant journals in three scientific specialities. Each list gives journal, (A) total 1974 citations, (B) impact factor, (C) total 1974 citations of 1974 articles, (D) number of 1974 articles. Journals are listed in alphabetical order. The botany journals include all with more than 600 citations or an impact greater than 1. The astronomy/astrophysics journals include all with more than 400 citations or an impact greater than 0.8. The mathematics journals include all with more than 500 citations or an impact greater than 0.5.

supports or contradicts the idea that science is built on the accumulated results of average effort that prepare the way for breakthroughs[10]. In any event, the data seem to me to warrant an examination of the cost-effectiveness of the present publishing system. Journals devote to the mass of rarely cited papers the same resources as to the small part that citation analysis shows to be important. Less than 1% of all papers cited will be cited ten or more times in any annual *SCI*. Although more than 40 million references have been processed for the *SCI* during the past fifteen years, only 116,400 papers have been cited ten times or more in any one year.

One would hope that the availability of *Journal Citation Reports* will have a salutary effect on editorial complacency. A change in a journal's citation rate or impact rate is proper reason for editorial concern, admitting that factors beyond editorial control may be responsible. Thus, a drop in the impact of the leading Soviet journal of physics, *Zhurnal Eksperimentalnoi i Teoreticheskoi Fiziki*, or a rise in the impact of *Teploenergetika* (translated as *Thermal Engineering*) may reflect a shift in interest or emphasis of research worldwide. But a change in citation rate or impact rate may just as likely reflect a change in quality of output.

Journal citation analysis can be quite complex in some cases. The problem of Soviet publications is one such case. Apart from the usual bibliographic problems encountered, one must deal with the fact that most leading Soviet journals appear in two versions, Russian and English. *Fizika i Tekhnika Poluprovodnikov* appears in English as *Soviet Physics Semiconductors*. Clearly that is not a close translation of the title, much less a transliteration. Such bibliographic casualness about titles is bad enough, but there is worse. Most of the retitled translations appear about a year after the originals. This means, if one assumes that the translation is the major stimulant of subsequent citation in Western journals, that the citable life of the Soviet literature is unfairly shortened at the outset by an overlong gestation period. And the outset is important, for if an article is going to be cited, it is most likely to be cited during the first or second year after publication. In the case of Russian journals, citations contributed by translated versions are usually out of phase with those of the rest of the literature. To assure confusion worse confounded, some of the translated versions have volume and page numbers different from the Russian originals. In our tabulations for the *JCR*, we have as far as possible compensated for these annoying vagaries.

As the data show, new journals can achieve high impact quickly. Good examples are *Cellular Immunology* (first published 1970) and *Prostaglandins* (1972). Their total 1974 citation counts were 2,809 and 1,470 respectively; their impacts, 4.848 and 5.247. Among the newer journals the 'European' journals are especially notable in this respect. *FEBS Letters* (began 1968, impact 3.049); *European Journal of Biochemistry* (began 1967, impact 3.874); *European Journal of Immunology* (began 1971, impact 4.852). We must hope that internationalisation of journals will continue. I believe that Latin-American, Asian, and African

journals would do well to consolidate in like manner to produce fewer but larger journals. It is clear that a large journal, even if less than first class, is more difficult to ignore than a smaller journal with equal and perhaps greater impact.

In some cases, however, consolidation is inappropriate and may be detrimental. Take, for example, *Journal of the American Chemical Society* (*JACS*) and *Journal of the Chemical Society*. The *Journal of the Chemical Society* encompasses nine different subtitled journals. If one were to consolidate comparable journals of the American Chemical Society, their total citation count would be about 183,000, almost double the 98,995 of the *JACS*. The impact of this conglomerate would, however, be only 3.381 (respectable enough) rather than 4.383. Insistence by the Chemical Society upon corporate identity for its journals by means of an identical "main title" with repeatedly retitled sections is the source of bibliographic confusion, as well as of much tedious work in sorting out citation data. It seems to me that most commercial publishers would have refused to scrap a title as well-known as *Transactions of the Faraday Society*. In my opinion, the umbrella of a corporate main title for all a society's journals does little for their individual identities.

I have avoided commentary on the performance of specific journals, preferring to use the space granted me here for data rather than comment and speculation. And I have published many such analyses, usually on a categorical basis in *Current Contents*. All of them have had the same purpose, and lead to the same general conclusion. Science needs objective criteria for measuring the performance of journals. Citation analysis seems to offer a sound beginning. Considering the paucity of management tools available to the average science librarian—general or specialist—and considering as well the often prejudicial role of individual scientists in journal selection (we all have our favourite journals), I feel that the *JCR* data can provide a more reliable basis for journal selection than any we have had until now.

SCIENCE

Citation Analysis as a Tool in Journal Evaluation

Journals can be ranked by frequency and impact of citations for science policy studies.

Eugene Garfield

As a communications system, the network of journals that play a paramount role in the exchange of scientific and technical information is little understood. Periodically since 1927, when Gross and Gross published their study (*1*) of references in 1 year's issues of the *Journal of the American Chemical Society*, pieces of the network have been illuminated by the work of Bradford (*2*), Allen (*3*), Gross and Woodford (*4*), Hooker (*5*), Henkle (*6*), Fussler (*7*), Brown (*8*), and others (*9*). Nevertheless, there is still no map of the journal network as a whole. To date, studies of the network and of the interrelation of its components have been limited in the number of journals, the areas of scientific study, and the periods of time their authors were able to consider. Such shortcomings have not been due to any lack of purpose, insight, or energy on the part of investigators, but to the practical difficulty of compiling and manipulating manually the enormous amount of necessary data.

A solution to this problem of data is available in the data base used to produce the *Science Citation Index* (SCI) (*10*). The coverage of the SCI is international and multidisciplinary; it has grown from 600 journals in 1964 to 2400 journals in 1972, and now includes the world's most important scientific and technical journals in most disciplines. The SCI is published quarterly and is cumulated annually and quinquennially, but the data base from which the volumes are compiled is maintained on magnetic tape and is updated weekly. At the end of 1971, this data base contained more than 27 million references to about 10 million different published items. These references appeared over the past decade in the footnotes and bibliographies of more than 2 million journal articles, communications, letters, and so on. The data base is, thus, not only multidisciplinary, it covers a substantial period of time and, being in machine-readable form, is amenable to extensive manipulation by computer.

In 1971, the Institute for Scientific Information (ISI) decided to undertake a systematic analysis of journal citation patterns across the whole of science and technology. It began by extracting from the data base all references published during the last quarter of 1969 in the 2200 journals then covered by the SCI. The resultant sample was about 1 million citations of journals, books, reports, theses, and so forth. To test whether this 3-month sample was representative of the year as a whole, it was matched against another sample made by selecting every 27th reference from the approximately 4 million references collected over the entire year. The two samples were similar enough in scope (number of different items cited) and detail (relative frequency of their citation by different journals) to convince us that the 3-month data constitute a valid sample.

With this data from the last quarter of 1969, ISI produced three listings that should greatly further efforts to map the network of journal information transfer. The first listing is a cumulation of all citations of the same titles. It gives the number of times each different title was cited during the last quarter of 1969 and distributes that total over the years in which cited issues, editions, and so on were published. This distribution is shown by year from 1969 back to 1960 and in aggregate form for earlier years (*11*). Sample items from this listing are shown in Fig. 1.

The second listing is a detailed citation history of each cited title. It shows how frequently each title was cited and, as above, gives subtotals by year of publication. These citation totals and subtotals are further broken down to show how frequently each journal covered by SCI cited the title in question and the distribution by year of publication of cited items. A portion of this listing is shown in Fig. 2.

The third listing is similar to the second, but it arranges the data by citing journal rather than by cited title. The listing shows, for each journal covered by the SCI, the number of references published in issues processed for the SCI during the last quarter of 1969, and it breaks that total down by publication date of the items to which reference was made. The listing further identifies all titles cited in those references and the frequency with which they are cited. As in Fig. 2, the counts for each cited title are broken down by year of publication. A portion of this listing is shown in Fig. 3.

These listings afford, I believe, a new view of the literature in scientific and technical journals. Before discussing some of its implications, however, I note possible limitations of the data and problems encountered in analyzing the sample.

The SCI data base is, to my knowledge, the largest and most extensive of its kind. It does not, however, cover every scientific and technical journal. (Nor, as seems likely in view of findings discussed later in this article, need it attempt to.) The list of most frequently cited journals (the first 152 of these journals are given in Fig. 4) shows that the SCI has been remarkably successful in covering all "significant" and "important" journals, insofar as citation counts can be considered a reliable measure of "importance" and "significance." It is, of course, possible that one or more journals not covered by the SCI, and thus not represented in the data here, may cite themselves and other journals so frequently that their inclusion would alter their own and other journals' rankings. Such may be the case, for example, with certain journals

The author is president of the Institute for Scientific Information, Philadelphia, Pennsylvania 19106.

Fig. 1. Journal citation frequencies. The data show the total number of times each journal was cited during the last quarter of 1969 and the distribution by publication date of the particular issues cited. The journals shown were taken from a list of more than 20,000 items (journals, books, reports, theses, and so on) cited during the last quarter of 1969 in journals covered by the SCI.

in foreign languages, particularly those that do not use the Roman alphabet. As is true of most secondary services, the SCI is less likely to cover a journal that presents problems of transliteration (or transcription) and translation than one that does not. It may be, therefore, that this fact has adversely influenced the ranking of Russian and Japanese journals, for example, which probably cite other Russian and Japanese journals more frequently than do journals in other languages. Whether such an underrepresentation exists, and, if so, to what extent, is difficult to determine. Nevertheless, Soviet information scientists have reported that the SCI does a surprisingly good job of covering Soviet journals. In fact, Soviet scientists seem to have made more use of citation analysis in studies of science policy than have any other scientists (*12–14*).

One must remember that the listings were prepared from a 3-month sample of journal issues. The size of the sample is certainly more than adequate for statistical purposes, and, as noted, the sample has been matched against another sample of more than adequate size. It is nevertheless possible that random events in journal publishing have introduced some degree of distortion. For example, a journal may have, in the time period covered by the sample, departed from its usual policy of accepting only original research communications and published one or two review articles with extensive bibliographies. In the sample, that journal would appear to cite other publications more widely and more frequently than it actually does on the average. Or, a journal may have published an article that has since been cited with extraordinary frequency (*15*). In such a case, a single article will have had an inordinate influence on the ranking of the journal (*16*). Finally, a journal that publishes relatively few articles, but articles of high quality that both cite and are cited frequently, may seem to have considerably less impact than it actually does, particularly if the journal appears infrequently or irregularly and thus escapes representative inclusion in a sample of this type.

In analysis of the sample, an immensely irksome problem was the inconsistency with which different authors and editors abbreviate journal titles in their references. As far as possible, this inconsistency has been minimized by standardizing all variants of the same titles and their abbreviations. Some idea of the work involved in this standardization can be had from the fact that there were more than 100,000 different abbreviations for the 12,000 individual journal titles cited in the 3-month sample (*17*). Inconsistency was made worse by inaccuracy. In some cases, it was possible to disentangle the results of bibliographic carelessness—as, for example, when *Sol. St. Phys.* proved to have been used indiscriminately to identify *Solid State Physics* (Academic Press); *Solid State Physics, Proceedings of the Physical Society, London; Soviet Physics Solid State* (a cover-to-cover translation of *Fizika Tverdogo Tela*); and even *Physica Status Solidi* (Akademie-Verlag). In other cases, however, it was impossible, without going to inordinate expense, to determine exactly which journal was being cited—for example, when *Ann. Phys.* was found to have been used for *Annalen der Physik, Annals of Physics*, and *Annales de Physique*. It is not surprising that the editors of at least one publishing house, having decided that the problem of unique and unambiguous journal title abbreviations is simply insoluble, now use full titles in every reference to a journal.

Fig. 2. Statistics on cited journals. The data on cited journals show the total number of times each journal was cited in the last quarter of 1969 and the distribution by publication date of cited issues. For each cited journal, the figure identifies all other journals ("citing journals") that referred to it five times or more during the quarter year (and the distribution of these citations by publication date of cited issues). Journals that referred to the cited journal less than five times are grouped as "all other." The data were taken from a complete list of journals cited during the last quarter of 1969 in journals covered by the SCI.

Finally, it was necessary to make some arbitrary decisions in order to avoid unduly complex bibliographical technicalities. Journals merge; they split into new journals, or into "sections" that may be published separately or together. They change titles, with or without continuing their numbering of volumes and issues. Some journals appear in one or more translations; some such translations are complete, others selective, and some are similarly, others differently, numbered. Supplements outside a regularly enumerated series must be accounted for. In a few cases, journals periodically change their titles on single issues to note special subject matter (*18*). Serials librarianship abounds in difficulties of this type, and there is frequently disagreement on how best to handle them. Briefly: a journal published in sections is considered a single journal; translations of journals are identified with the original versions; changes of title have been ignored and previous volumes attributed to the current title; journals absorbed or incorporated by other journals have been credited to a new or remaining title; supplements have been considered as issues in the regular series. For the purposes of this analysis, such arbitrary decisions seem justified; as required in the future, the raw citation data can, of course, be compiled and manipulated in such a way as to differentiate between changed titles, sections, translations, and so forth.

Some Preliminary Analyses

Figure 4 shows the result of a familiar application of citation analysis. It is a listing of journal titles ranked by the frequency with which they were cited in the references of journals indexed for SCI. This partial listing gives the top 152 of the 565 most frequently cited journals of science and technology. (The top 152 account for 50 percent of all references to journals.)

It is apparent, even from the makeup of this partial listing, that a good multidisciplinary journal collection need contain no more than a few hundred titles. That is not to say that larger collections cannot be justified, but it does say something indisputable, in terms of cost and benefit, about how large a journal collection need be (or how small it can be) if it is to provide effective coverage of the literature most used by research scientists.

It is also immediately apparent that the majority of all references cite relatively few journals. Figure 5, which plots the distribution of citations among cited journals, shows that only 25 journals (little more than 1 percent of SCI coverage) are cited in 24 percent of all references; that only 152 journals (those listed in Fig. 4) are cited in 50 percent of all references; that only 767 journals are cited in 75 percent of all references; and that only 2000 or so journals are cited in 85 percent of all references. In addition, the data from which Fig. 5 was plotted show that only 540 journals are cited 1000 or more times a year, and that only 968 journals are cited even 400 times a year. When one considers that only 165 or so journals publish 400 or more papers a year, the impact of the average paper must be recognized as relatively slight. In fact, the average paper is cited only 1.7 times a year (*19*).

This analysis gives good reason for concern about any increase in the number of scientific and technical journals. It is not merely that increased numbers of journals make coverage of the literature more difficult, but that so many journals now being published seem to play only a marginal role, if any, in the effective transfer of scientific information. If one accepts the contention (highly debatable, in my opinion) that there are between 50,000 and 100,000 scientific and technical "journals," the data presented here indicate that only 5 to 6 percent of them are being cited. If such percentages seem unrealistically low, it may be because the estimate of 50,000 to 100,000 scientific and technical journals (requiring indexing and abstracting for "total coverage" of the literature) is itself as unrealistic as information scientists have for some time suspected it must be (*20*). Meaningful discussion of this point—the best of current serials catalogs notwithstanding—is probably impossible in the absence of agreement on what, quantitatively as well as qualitatively, constitutes a "scientific journal." At the very least, it may be advisable to distinguish as journals only those periodicals that publish, for example, 20 or more articles a year.

The predominance of a small group of journals in the citation network has been confirmed by a weekly scanning of SCI input to a system for selective dissemination of information (SDI) (*21*). In this SDI system, a newly published article can be retrieved on the basis of journals cited in the article's bibliography or footnotes. This retrieval criterion is known in an SDI profile as a "cited-journal question." A retrieval profile consisting of only 25 different cited-journal questions will retrieve 50 percent of all articles processed for the SCI every week. In other words, half of all articles published cite at least one of the 25 most frequently cited journals at least once.

It is also interesting that a small group of journals is found to be predominant when the literature is analyzed in other ways. Figure 6, for ex-

Fig. 4. The 152 most frequently cited journals ranked by frequency of citation in journals covered by the SCI. Column 1 gives rank, and column 2 gives abbreviations of the titles of cited journals. Column 3 shows the total number of times each journal was cited during the last quarter of 1969. Column 4 gives an estimate of the total number of citations in 1969 of items published in 1967 and 1968 (the estimate was made by quadrupling the 1969 citations of 1967 and 1968 items in the 3-month sample). Column 5 shows the total number of items processed from each journal by the SCI during 1967 and 1968. Column 6 indicates the impact factor (average citations per published item) derived by dividing the numbers in column 4 by those in column 5.

(The reader may be interested in comparing the order of journals in this figure with that in the list for 1974 on page 20 of this volume.)

ample, plots numbers of articles published against numbers of journals. It shows that, of the 2200 journals covered by the SCI in 1969, about 500 published about 70 percent of all articles published. As shown in Fig. 7, a small group of 250 journals provided almost half of the 3.85 million references processed for the SCI in 1969. The predominance of cores of journals is ubiquitous. An analysis of what journals first published reports of newly synthesized compounds indexed for *Current Abstracts of Chemistry and Index Chemicus* gives a similar result: of the 183 journals indexed by this publication in 1969, 11 percent of the journals accounted for 60 percent of the new compounds, 22 percent of the journals for 79 percent of the compounds, 32 percent of the journals for 89 percent of the compounds, and so on (*22*). *Chemical Abstracts* presents an even more striking example of this predominance: about 8 percent of the journals it covers publish more than 75 percent of the items it abstracts (*23*).

The data reported here demonstrate the predominance of a small group of journals in the citation network. Indeed, the evidence seems so conclusive that I can with confidence generalize Bradford's bibliographical law concerning the concentration and dispersion of the literature of individual disciplines and specialties (*2*). Going beyond Bradford's studies, I can say that a combination of the literature of individual disciplines and specialties produces a multidisciplinary core for all of science comprising no more than 1000 journals. The essential multidisciplinary core could, indeed, be made up of as few as 500 journals if, for example, one is attempting to satisfy the needs of libraries in developing countries.

Other Considerations

Citation frequency reflects a journal's value and the use made of it, but there are undoubtedly highly useful journals that are not cited frequently. Scientists read some journals for the same reason people read newspapers—to keep up with what's going on generally—and they may rarely or never cite such journals in their published work (*24*). A popular review journal such as *Scientific American* or a news-oriented journal such as *New Scientist* may rank relatively low on a times-cited list (in

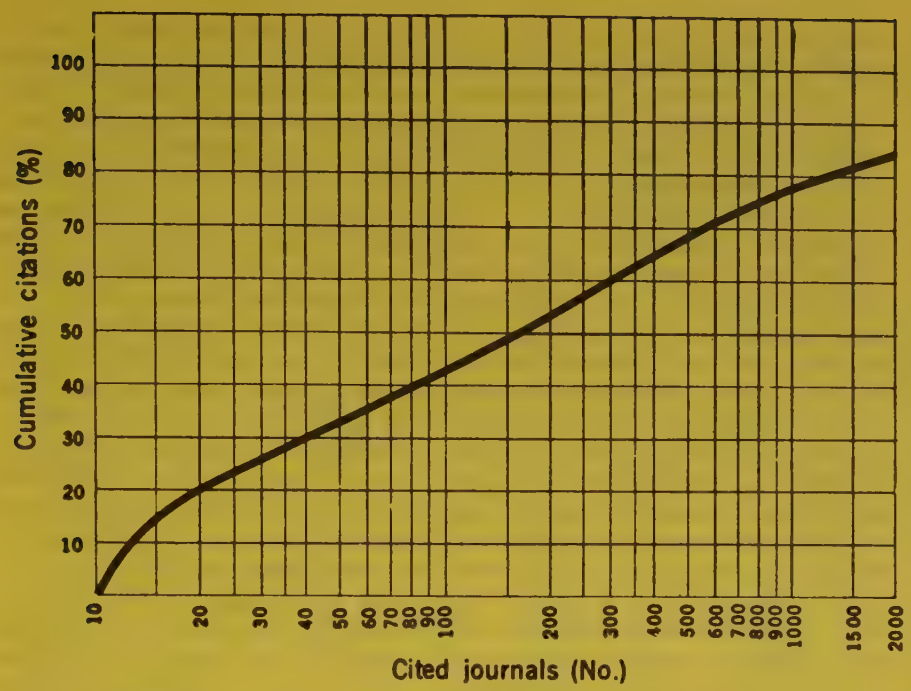

Fig. 5. Distribution of citations among cited journals. The curve shows that a relatively small core of 152 journals accounts for about half of all citations and that only 2000 or so journals account for about 84 percent of all citations.

fact, *Scientific American* is 449th, while *New Scientist* ranks well below 1000), but that does not mean that they are therefore less important or less widely used than journals that are cited more frequently. It merely means that they are written and read primarily for some purpose other than the communication of original research findings.

Citation frequency is, of course, a function of many variables besides scientific merit. Some of them are known or can reasonably be assumed: an author's reputation, controversiality of subject matter, circulation, availability and extent of library holdings, reprint dissemination, coverage by secondary services, priority in allocation of research funds, and others. It is extremely difficult, even when possible, to clarify the relations among such variables and their relative impact on citation frequency. One such variable is, however, fairly obvious. If every article has an equal likelihood of being cited, it should follow that the more articles a journal publishes, the more frequently the journal will be cited. For the most part, the data show that such is indeed the case. Although many articles are never cited (*25, 26*), I have very rarely found among the 1000 most frequently cited journals one that is not also among the 1000 journals that are most productive in terms of articles published. Citation frequency of a journal is thus a function not only of the scientific significance of the material it publishes (as reflected by citation), but also of the amount of material it publishes.

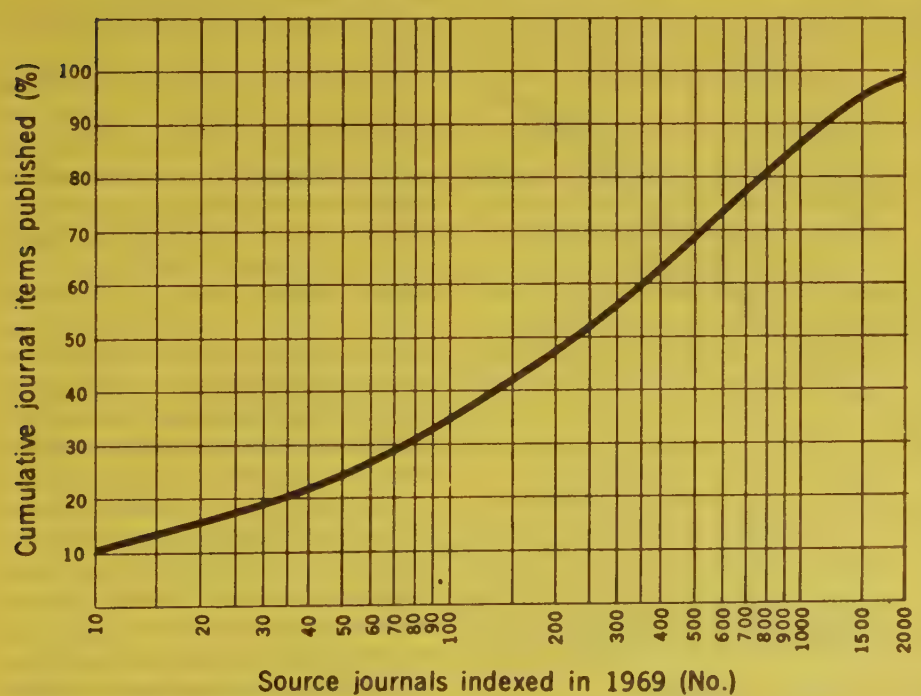

Fig. 6. Distribution of the number of published items among the approximately 2200 journals covered by the SCI in 1969. The curve shows that a relatively small core of journals carried the majority of items published.

In view of the relation between size and citation frequency, it would seem desirable to discount the effect of size when using citation data to assess a journal's importance. We have attempted to do this by calculating a relative impact factor—that is, by dividing the number of times a journal has been cited by the number of articles it has published during some specific period of time. The journal impact factor will thus reflect an average citation rate per published article (*27*). However, the development of impact factors that fairly relate the size of a journal during the cited years to its current citation rate is a formidable challenge to statistical analysis. With the SCI data base, it is easy to determine how frequently a journal has been cited within a given period of time, but it is much more difficult to agree on a total-items-published base to which such citation counts can properly be related because the items may have been published at any point in the journal's history. In selecting an items-published base (*28*) for each journal, I have been guided by the chronological distribution of cited items in each annual edition of the SCI (*19*, p. 15; *29*). An analysis of this distribution has shown that the typical cited article is most heavily cited during the 2 years after its year of publication. (In any given year, 21 to 25 percent of all references cite articles that are 3 or fewer years old.) Therefore, since my sample consists of references made in 1969, I have taken as the items-published base for each journal the number of items it published during 1967 and 1968. To calculate an impact factor for each journal, I divided the number of times 1967 and

1968 articles were cited in 1969 by the number of articles published in 1967 and 1968. Martyn and Gilchrist used a similar method in ranking British journals in an analysis of 1965 SCI data (*30*).

Figure 8 shows the top 152 of the 565 most frequently cited journals ranked by impact factor. Many of the 152 journals do not appear on this high-impact list; in fact, only 75 journals are common to both lists. It will be interesting to observe further changes in the ranking of the most frequently cited journals as calculations of impact factor are extended to 1000 journals and eventually to the approximately 2400 journals now covered by the SCI.

Some Applications

The results of this type of citation analysis would appear to be of great potential value in the management of library journal collections. Measures of citation frequency and impact factor should be helpful in determining the optimum makeup of both special and general collections. Analysis of the chronological distribution of items cited can serve as a guide in determining the optimum size of back files, and, since the data give a detailed view of each journal's citation history, binding and retention schedules can be rationally established journal by journal, rather than for groups of journals (*31*). Another application, which harried librarians may welcome, is the correlation of data on citation frequency and impact with subscription costs. Such a correlation can provide a solid basis for cost-benefit analysis in the management of subscription budgets.

Individual scientists also face the problem of selecting journals to read and keep, as well as compiling reference and reading lists for themselves and their students. Although each of the relatively few journals that are very useful in a given discipline or specialty may be well known, it can be difficult to gauge the merits of the other journals in that discipline or specialty and to decide what journals to get and how long to keep them. It should be noted, in this connection, that analyses of citation frequency and impact factor can be tailored to the specific interests and requirements of individuals by restricting the number of citing journals to a small group of familiar titles. Thus, with a list of the ten or so most frequently cited chemical journals (or merely ten journals favored by a particular chemist), one can, by constructing lists of citation frequency and impact factor, gradually augment the small group and the citation data base with journals of demonstrable relevance. I am using this technique to establish a list of journals for the projected *Social Sciences Citation Index*.

Editors and editorial boards of scientific and technical journals may also find citation analysis helpful. As it is, those who formulate editorial policies have few objective and timely measures of their success. A wrong policy, or a policy wrongly implemented, may have serious effects on revenue and prestige, and the work of regaining readers and reputation can be difficult and expensive. Editors can find useful indicators of a journal's performance in the extent of self-citation, the number of times cited per year, and the distribution of citations among citing journals within and outside the specialty literature.

Perhaps the most important application of citation analysis is in studies of science policy and research evaluation. Price has shown how citation data can be used to identify research fronts (*25*). Soviet information scientists are using citation data to evaluate the implementation of science policy in the U.S.S.R. (*12, 14, 32*), and the sociological studies of Hagstrom and others (*33*) give convincing evidence of the utility of this approach.

Unanswered Questions

The data reported here suggest many avenues for further study. What, for example, is the significance of an abnormally high self-citation rate? Is it characteristic of parochialism, eccentricity, mediocrity? Does it indicate that a particular field of study has as yet no basis for interaction with other fields? Which is true in a particular case and how does one go about finding out?

What is the significance of a wide, multidisciplinary spread of titles cited in the references of a given journal or group of journals? Is it a measure of multidisciplinary activity? If so, is it a valid enough measure to warrant applying the Weinberg criterion (*34*) of multidisciplinary impact in order to determine the amount of government support merited by particular areas of research? Does the fact that *Ecology*, for example, cites more than 500 different journals in a total of 1000 references make it more multidisciplinary than the *Journal of the American Chemical Society*, which cites only twice as many journals in ten times the number of references, or than *Physical Review*, which cites only 600 or so journals in 15,000 references? Does the nonlinearity of publication and citation distributions among citing and cited journals confirm beyond doubt only that relatively few journals are primary nodes

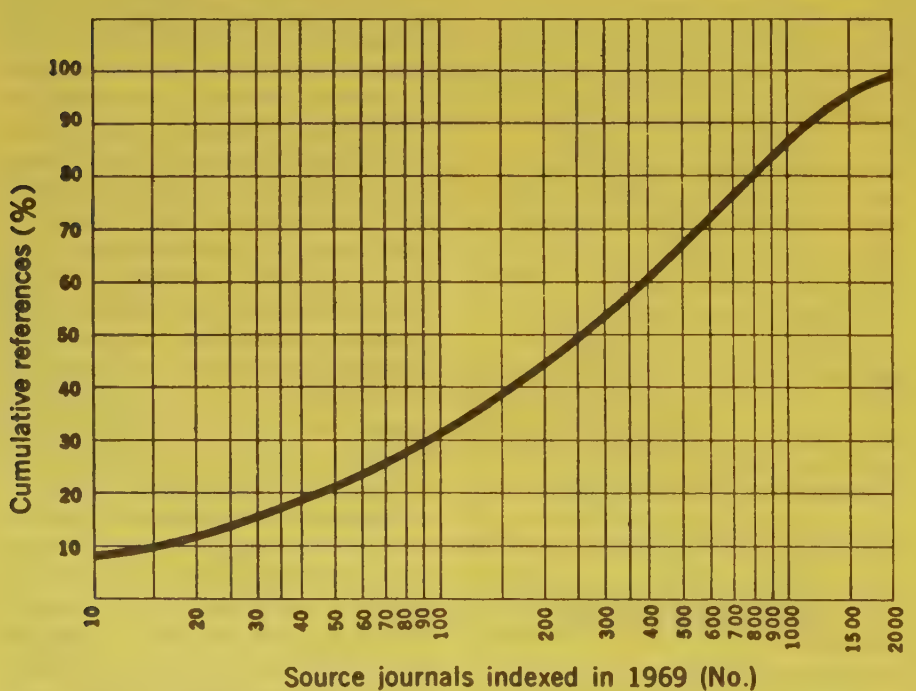

Fig. 7. Distribution of references among journals covered by the SCI in 1969. The curve shows that fewer than 300 journals provided more than half of the references processed.

Fig. 8. The 152 most frequently cited journals ranked by impact factor (average number of citations per item published). The column headings are explained in the legend of Fig. 4.

* There was an error in the numbers given in cols. 5 and 6 of this figure for *Accounts Chem Res* when this article was originally published in *Science*. The error has been corrected in this reprint.

in the communications network, or does it have some other significance?

And what is the significance of a wide disparity between the number of journals cited by a given journal and the number that cite it? *Ecology* cites 500 or so journals but, in turn, is cited by only 115. What does this say, other than the obvious, about ecology and *Ecology*? Is the applicability of work done in ecology and being reported in *Ecology* much narrower than the interests of ecologists?

Several investigators of problems in science policy and science management are already using the SCI data base to explore such questions and many others. Each is trying, for different reasons, to build a model of the journal communication network that will provide more functional definitions of disciplines and specialties, that will make it possible to define in detail how different fields of knowledge interact, that will provide methods of predicting interdisciplinary impact, and that will perhaps provide more effective ways of monitoring research performance. Using the SCI data base to map the journal communications network may contribute to more efficient science.

15. A list of articles that have been cited very frequently has been published: E. Garfield, "Citation indexing, historio-bibliography, and the sociology of science." In: *Proceedings of the Third International Congress of Medical Librarianship, Amsterdam, 5-7 May 1969*, (Excerpta Medica, Amsterdam, 1970), p. 187-204.
16. For example, in 1951 the *Journal of Biological Chemistry* (*JBC*) published an article by O. H. Lowry *et al.* on protein analysis: O. H. Lowry, N. J. Rosebrough, A. L. Farr, and R. J. Randall, Protein measurement with the folin phenol reagent. *J. Biol. Chem.* **193**, 265 (1951). That article represents only 0.7% of the *JBC*'s average quarterly output, but it accounts for 5% of all citations of the *JBC* in our quarter-year sample. Lowry's article is not as atypical of articles from *JBC* as it is atypical of all articles. Of the 50 articles most cited in 1967, 13 (26%) had appeared in *JBC*.
17. The largest number of variants of the same journal title and its abbreviations was 42, the total reached in the case of *Comptes Rendus Hebdomadaires des Seances de l'Academie des Sciences*.
18. For example, the *South African Journal of Obstetrics and Gynaecology*, the *South African Journal of Nutrition*, the *South African Journal of Radiology*, and others are composed of specially titled (and color-coded) issues from the regularly numbered series of the *South African Medical Journal*.
19. *Science Citation Index 1970 Guide & Journal Lists* (Institute for Scientific Information, Philadelphia, 1971), p. 14. For the years 1964 to 1970, the number of citations per year per cited item has been, respectively, 1.60, 1.65, 1.65, 1.66, 1.67, 1.67, and 1.73.

26. ———, Citation practice. *Aslib Proc.* **21**, 328 (1969).
27. The impact factor discussed in this article (average citation rate per published item) gives some idea of the frequency with which the "average" paper in a particular journal is cited. The factor is, of course, adversely affected by papers in the journal which are not cited at all, and, as noted above, favorably affected by papers cited with unusual frequency. The influence of uncited and very frequently cited papers can be discounted by considering the total number of citations in relation to cited items only (rather than in relation to all published items), or by considering only number of cited items (rather than total citations) in relation to all published items. For example, if the items-published base is 100 articles and one article has been cited 50 times while 99 articles have not been cited at all, the impact factor would be 0.50. The same impact factor of 0.50 could be derived for the journal that had half of its 100 articles cited only once and the other half not cited at all. If one considers only cited items, a per-cited-item impact factor can be derived to distinguish between the two journals. In the first case, the per-cited-item impact factor would be 50.0; in the second, 1.0. If one considers only the number of citable items cited, a citable-items-cited impact factor can be derived to further distinguish between the two journals. In the first case, the citable-items-cited impact factor would be 0.01; in the second, 0.5. Enormous amounts of computer time would be required to derive these different impact factors, although one must acknowledge their potential usefulness. It should be noted also that either of these impact factors can be derived from the other by dividing one of them into the impact factor used in this article.
28. The problem of selecting an items-published base is further complicated by the variety in the kinds of items published in scientific journals. Many journals publish only full-length reports of original research. Many others publish, in addition, editorials, technical communications, letters, notes, general correspondence, scientific news surveys and notes, book reviews, and so on; all of these are potentially citable items. I have not attempted in this article to limit the definition of items-published to lead articles, original communications, or the like. Even assuming it were possible to construct an acceptable classification that would accommodate all of the different kinds of published material, it would have been impossible for me, within the resources available for this article, to have examined individually each of the approximately 600,000 items that I use for the items-published base. If such a differentiation among kinds of material were included in an analysis such as this one, it is reasonable to assume that lead articles in such journals as *Science*, *Nature*, *Lancet*, and *Journal of the American Medical Association* would, as a group, have higher impact factors than those that are shown for these journals in Fig. 8.
29. The percentage (in terms of total citations) of citations of items that are 3 or fewer years old has been, for the years 1964 to 1970, 31.09, 30.24, 26.60, 25.91, 25.32, 25.18, and 23.95, respectively. It is interesting to note that the yearly percentage of such items has gradually decreased as SCI coverage has increased, while the citation rate per cited item has gradually increased (*19*). The significance of these trends is an interesting matter for future investigation.

Selected Bibliography
on
Journal Citation Analysis and Its Applications

This bibliography is by no means exhaustive. The author has endeavored, however, to include what he believes to be valuable background and useful examples of the application of citation analysis to the study of the sociology of science. Many of the items listed are the author's own work. Their number reflects no exclusive scope or merit of activity, but rather the author's interest and his access to ISI®'s unique data bank. Additional references on citation indexing, citation analysis, and journal evaluation will be found in the paper reprinted as part of this introduction.

Garfield E. *Essays of an Information Scientist.* Philadelphia: ISI Press, 1977. 2 vols. (The following essays, which first appeared in *Current Contents* on the dates indicated in parenthesis, are reprinted in this collection.)

Journal citation studies:

1. What is the "core" literature of biochemistry as compared to the "core" of chemistry? **1**:262-265 (February 2, 1972).

2. What is the "core" literature of chemical physics? **1**:274-277 (March 1, 1972).

3. *Journal of Experimental medicine* compared with *Journal of Immunology,* or, how much of a clinician is the immunologist? **1**:326-329 (June 28, 1972).

4. The literature cited in rheumatology is not much different from that of other specialties. 1:338-341 (August 2, 1972).

5. Is paleontology a life or a physical science? *JCI* reveals gap in coverage of paleontology and need for better small journal statistics. **1**:423-424 (March 28, 1975).

6. *Journal of Clinical Investigation.* How much "clinical" and how much "investigation"? **2**:13-16 (January 23, 1974).

7. *Journal of American Medical Association* vs *New England Journal of Medicine.* **2**:17-20 (January 30, 1974).

8. Some highly cited articles from highly cited general medical and clinical journals. **2**:86-93 (July 3, 1974).

9. Highly cited pediatric journals and articles. **2**:97-101 (July 17, 1974).

10. Geology and geophysics. **2**:102-106 (July 24, 1974).

11. *Journal of Geophysical Research* **2**:114-117 (August 14, 1974).

12. *Astrophysical Journal* and its *Supplements.* **2**:120-124 (August 28, 1974).

13. *Acta Crystallographica.* **2**:128-133 (September 11, 1974).

14. Wherein we observe that physicists cite different physics journals than other people. **2**:154-157 (October 2, 1974).

15. Cancer journals and articles. **2**:160-167 (October 16, 1974).

16. Clinical Chemistry and Clinical Chimica Acta. **2**:179-183 (November 27, 1974).

17. Journal self-citation rates—there's a difference. **2**:192-194 (December 25, 1974).

18. Highly cited botany journals. **2**:205-209 (January 13, 1975).

19. Psychology and behavior journals **2**:231-235 (March 3, 1975).

20. Agriculture journals and the agriculture literature. **2**:272-278 (May 19, 1975).

21. Engineering journals. **2**:304-309 (July 7, 1975).

23. French journals—What they cite and what cites them. **2**:409-414 (January 26, 1976).

24. Japanese journals—What they cite and what cites them. **2**:430-435 (March 1, 1976).

25. German Journals—What they cite and vice versa. **2**:467-473 (May 3, 1976).

26. Latin-American journals. **2**:577-583 (September 13, 1976).

27. Australian and New Zealand citers and citees. **2**:584-589 (September 20, 1976).

28. Scandinavian journals. **2**:599-605 (October 11, 1976).

29. East European journals. **2**:623-630 (November 8, 1976).

30. Italian journals. *CC* No. 4, p. 5-9 (January 24, 1977).

SCI® Journal Citation Reports® —1977

FULL TITLES OF CITING/CITED JOURNALS

The *Abbreviated-to-Full-Title Listing* contains the 20-character *JCR* journal abbreviation listed with the full title for all main entries in the *Citing Journal* and *Cited Journal Packages* as well as subentries in the *Cited Journal Package*. It also contains the full titles for many of the subentries in the *Citing Journal Package*. But since a journal article may make reference to anything that has ever been published as well as unpublished material, all of the citing subentries could not possibly be included in the *Abbreviated-to-Full-Title Listing*. This listing merely attempts to include the full title of a majority of the abbreviations that will be encountered in the *JCR*™.

ABBREVIATION	FULL TITLE
A GRAEF A KL EXP OPH	ALBRECHT VON GRAEFES ARCHIV FUR KLINISCHE UND EXPERIMENTELLE OPHTHALMOLOGIE
A VAN LEEUW J MICROB	ANTONIE VAN LEEUWENHOEK JOURNAL OF MICROBIOLOGY AND SEROLOGY
AAPG BULL	AAPG BULLETIN-AMERICAN ASSOCIATION OF PETROLEUM GEOLOGISTS
AAUP BULL	AAUP BULLETIN-AMERICAN ASSOCIATION OF UNIVERSITY PROFESSORS BULLETIN
ABACUS	ABACUS
ABSTR PAP AM CHEM S	ABSTRACTS OF PAPERS. AMERICAN CHEMICAL SOCIETY
ACAD MANAGE J	ACADEMY OF MANAGEMENT JOURNAL
ACAD THER	ACADEMIC THERAPY
ACCIDENT ANAL PREV	ACCIDENT ANALYSIS AND PREVENTION
ACCOUNT REV	ACCOUNTING REVIEW
ACCOUNTS CHEM RES	ACCOUNTS OF CHEMICAL RESEARCH
ACS SYM SER	ACS SYMPOSIUM SERIES
ACT RES REP	ACT RESEARCH REPORT
ACTA AGRON HUNG	ACTA AGRONOMICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA ALLERGOL	ACTA ALLERGOLOGICA
ACTA ANAESTH SCAND	ACTA ANAESTHESIOLOGICA SCANDINAVICA
ACTA ANAT	ACTA ANATOMICA
ACTA ARCHAEOL-DEN	ACTA ARCHAEOLOGICA
ACTA ASTRONAUT	ACTA ASTRONAUTICA
ACTA BIOCHIM BIOPHYS	ACTA BIOCHIMICA ET BIOPHYSICA
ACTA BIOCHIM POL	ACTA BIOCHIMICA POLONICA
ACTA BIOL CRACOV BOT	ACTA BIOLOGICA CRACOVIENSIA. SERIES BOTANICA
ACTA BIOL CRACOV ZOO	ACTA BIOLOGICA CRACOVIENSIA SERIES ZOOLOGIA
ACTA BIOL HUNG	ACTA BIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA BIOL MED GER	ACTA BIOLOGICA ET MEDICA GERMANICA
ACTA BIOTHEOR	ACTA BIOTHEORETICA
ACTA BOT NEERL	ACTA BOTANICA NEERLANDICA
ACTA CARDIOL	ACTA CARDIOLOGICA
ACTA CHEM SCAND	ACTA CHEMICA SCANDINAVICA
ACTA CHEM SCAND A	ACTA CHEMICA SCANDINAVICA. SERIES A. PHYSICAL AND INORGANIC CHEMISTRY
ACTA CHEM SCAND B	ACTA CHEMICA SCANDINAVICA. SERIES B. ORGANIC CHEMISTRY AND BIOCHEMISTRY
ACTA CHIM HUNG	ACTA CHIMICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA CHIR AUSTRIACA	ACTA CHIRURGICA AUSTRIACA
ACTA CHIR BELG	ACTA CHIRURGICA BELGICA
ACTA CHIR HUNG	ACTA CHIRURGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA CHIR PLAST	ACTA CHIRURGIAE PLASTICAE
ACTA CHIR SCAND	ACTA CHIRURGICA SCANDINAVICA
ACTA CIENT VENEZ	ACTA CIENTIFICA VENEZOLANA
ACTA CLIN BELG	ACTA CLINICA BELGICA
ACTA CRYSTALLOGR	ACTA CRYSTALLOGRAPHICA
ACTA CRYSTALLOGR A	ACTA CRYSTALLOGRAPHICA. SECTION A
ACTA CRYSTALLOGR B	ACTA CRYSTALLOGRAPHICA. SECTION B
ACTA CYTOL	ACTA CYTOLOGICA
ACTA DERM-VENEREOL	ACTA DERMATO-VENEREOLOGICA
ACTA DIABETOL LAT	ACTA DIABETOLOGICA LATINA
ACTA EMBRYOL EXP	ACTA EMBRYOLOGIAE EXPERIMENTALIS
ACTA ENDOCRINOL-COP	ACTA ENDOCRINOLOGICA
ACTA ENTOMOL BOHEMOS	ACTA ENTOMOLOGICA BOHEMOSLOVACA
ACTA GASTRO-ENT BELG	ACTA GASTRO-ENTEROLOGICA BELGICA
ACTA GENET MED GEMEL	ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE
ACTA GEOGR	ACTA GEOGRAPHICA (FRANCE)
ACTA GERONTOL	ACTA GERONTOLOGICA
ACTA GINECOL-MADRID	ACTA GINECOLOGICA
ACTA HAEMATOL JAPON	ACTA HAEMATOLOGICA JAPONICA
ACTA HAEMATOL-BASEL	ACTA HAEMATOLOGICA
ACTA HEPATO-GASTRO	ACTA HEPATO-GASTROENTEROLOGICA
ACTA HISTOCHEM	ACTA HISTOCHEMICA
ACTA HISTOCHEM CYTOC	ACTA HISTOCHEMICA ET CYTOCHEMICA
ACTA INFORM	ACTA INFORMATICA
ACTA MATH HUNG	ACTA MATHEMATICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MATH-DJURSHOLM	ACTA MATH-DJURSHOLM
ACTA MECH	ACTA MECHANICA
ACTA MED HUNG	ACTA MEDICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MED OKAYAMA	ACTA MEDICA OKAYAMA
ACTA MED POL	ACTA MEDICA POLONA
ACTA MED SCAND	ACTA MEDICA SCANDINAVICA
ACTA METALL	ACTA METALLURGICA
ACTA MICROBIOL HUNG	ACTA MICROBIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MICROBIOL POL	ACTA MICROBIOLOGICA POLONICA
ACTA MORPHOL HUNG	ACTA MORPHOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MORPHOL NEER SC	ACTA MORPHOLOGICA NEERLANDO-SCANDINAVICA
ACTA NEUROBIOL EXP	ACTA NEUROBIOLOGIAE EXPERIMENTALIS
ACTA NEUROCHIR	ACTA NEUROCHIRURGICA
ACTA NEUROL BELG	ACTA NEUROLOGICA BELGICA
ACTA NEUROL SCAND	ACTA NEUROLOGICA SCANDINAVICA
ACTA NEUROPATHOL	ACTA NEUROPATHOLOGICA
ACTA OBSTET GYN SCAN	ACTA OBSTETRICIA ET GYNECOLOGICA SCANDINAVICA
ACTA ODONTOL SCAND	ACTA ODONTOLOGICA SCANDINAVICA
ACTA OECON	ACTA OECONOMICA
ACTA OPHTHALMOL	ACTA OPHTHALMOLOGICA KOBENHAVN
ACTA ORTHOP SCAND	ACTA ORTHOPAEDICA SCANDINAVICA
ACTA OTO-LARYNGOL	ACTA OTO-LARYNGOLOGICA
ACTA PAEDIATR BELG	ACTA PAEDIATRICA BELGICA
ACTA PAEDIATR HUNG	ACTA PAEDIATRICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PAEDIATR JAPON	ACTA PAEDIATRICA JAPONICA
ACTA PAEDIATR SCAND	ACTA PAEDIATRICA SCANDINAVICA
ACTA PAEDOPSYCHIATR	ACTA PAEDOPSYCHIATRICA
ACTA PATHOL JAPON	ACTA PATHOLOGICA JAPONICA
ACTA PATHOL MIC SC	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA
ACTA PATHOL MIC SC A	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA SECTION A-PATHOLOGY
ACTA PATHOL MIC SC B	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA SECTION B-MICROBIOLOGY
ACTA PATHOL MIC SC C	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA SECTION C-IMMUNOLOGY
ACTA PHARM SUEC	ACTA PHARMACEUTICA SUECICA
ACTA PHARMACOL TOX	ACTA PHARMACOLOGICA ET TOXICOLOGICA
ACTA PHYS AUSTRIACA	ACTA PHYSICA AUSTRIACA
ACTA PHYS CHEM	ACTA PHYSICA ET CHEMICA
ACTA PHYS HUNG	ACTA PHYSICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PHYS POL A	ACTA PHYSICA POLONICA A
ACTA PHYS POL B	ACTA PHYSICA POLONICA B
ACTA PHYSIOL HUNG	ACTA PHYSIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PHYSIOL LAT AM	ACTA PHYSIOLOGICA LATINO-AMERICANA
ACTA PHYSIOL POL	ACTA PHYSIOLOGICA POLONICA
ACTA PHYSIOL SCAND	ACTA PHYSIOLOGICA SCANDINAVICA
ACTA POL PHARM	ACTA POLONIAE PHARMACEUTICA
ACTA POLYTECH SC AP	ACTA POLYTECHNICA SCANDINAVICA. APPLIED PHYSICS SERIES
ACTA POLYTECH SC CH	ACTA POLYTECHNICA SCANDINAVICA. CHEMISTRY INCLUDING METALLURGY SERIES

ABBREVIATION	FULL TITLE
ACTA POLYTECH SC CI	ACTA POLYTECHNICA SCANDINAVICA. CIVIL ENGINEERING AND BUILDING CONSTRUCTION SERIES
ACTA POLYTECH SC EL	ACTA POLYTECHNICA SCANDINAVICA. ELECTRICAL ENGINEERING SERIES
ACTA POLYTECH SC MA	ACTA POLYTECHNICA SCANDINAVICA. MATHEMATICS AND COMPUTING MACHINERY SERIES
ACTA POLYTECH SC ME	ACTA POLYTECHNICA SCANDINAVICA. MECHANICAL ENGINEERING SERIES
ACTA POLYTECH SC PH	ACTA POLYTECHNICA SCANDINAVICA. PHYSICS INCLUDING NUCLEONICS SERIES
ACTA PSIQUIAT PSICOL	ACTA PSIQUIATRICA Y PSICOLOGICA DE AMERICA LATINA
ACTA PSYCHIAT SCAND	ACTA PSYCHIATRICA SCANDINAVICA
ACTA PSYCHOL	ACTA PSYCHOLOGICA
ACTA PSYCHOL TAIWAN	ACTA PSYCHOLOGICA TAIWANICA
ACTA RADIOL	ACTA RADIOLOGICA
ACTA RADIOL DIAGN	ACTA RADIOLOGICA. DIAGNOSIS
ACTA RADIOL THER PHY	ACTA RADIOLOGICA. THERAPY, PHYSICS, BIOLOGY
ACTA SCI MATH	ACTA SCIENTIARUM MATHEMATICARUM
ACTA SOCIOL	ACTA SOCIOLOGICA
ACTA TECH HUNG	ACTA TECHNICA ACADEMIAE SCIENTIARUM HUNGARICAE

ADV CHEM PHYS	ADVANCES IN CHEMICAL PHYSICS
ADV CHEM SER	ADVANCES IN CHEMISTRY SERIES
ADV CHILD DEV	ADVANCES IN CHILD DEVELOPMENT AND BEHAVIOR
ADV CHROMATOGR	ADVANCES IN CHROMATOGRAPHY
ADV CLIN CHEM	ADVANCES IN CLINICAL CHEMISTRY
ADV COLLOID INTERFAC	ADVANCES IN COLLOID AND INTERFACE SCIENCE
ADV COMP PHYSIOL BIO	ADVANCES IN COMPARATIVE PHYSIOLOGY AND BIOCHEMISTRY
ADV COMPUT	ADVANCES IN COMPUTERS
ADV CONTROL SYST	ADVANCES IN CONTROL SYSTEMS THEORY AND APPLICATIONS
ADV CYCLIC NUCL RES	ADVANCES IN CYCLIC NUCLEOTIDE RESEARCH
ADV DRUG RES	ADVANCES IN DRUG RESEARCH
ADV ECOL RES	ADVANCES IN ECOLOGICAL RESEARCH
ADV ELECTROCHEM ELEC	ADVANCES IN ELECTROCHEMISTRY AND ELECTROCHEMICAL ENGINEERING
ADV ELECTRON EL PHYS	ADVANCES IN ELECTRONICS & ELECTRON PHYSICS
ADV ENVIRON SCI TECH	ADVANCES IN ENVIRONMENTAL SCIENCE AND TECHNOLOGY
ADV ENZYME REGUL	ADVANCES IN ENZYME REGULATION
ADV ENZYMOL RAMB	ADVANCES IN ENZYMOLOGY AND RELATED AREAS OF MOLECULAR BIOLOGY
ADV EXP MED BIOL	ADVANCES IN EXPERIMENTAL MEDICINE AND BIOLOGY
ADV EXP SOC PSYCHOL	ADVANCES IN EXPERIMENTAL SOCIAL PSYCHOLOGY
ADV FOOD RES	ADVANCES IN FOOD RESEARCH
ADV GENET	ADVANCES IN GENETICS
ADV GEOPHYS	ADVANCES IN GEOPHYSICS
ADV GERONTOL RES	ADVANCES IN GERONTOLOGICAL RESEARCH
ADV HEAT TRANSFER	ADVANCES IN HEAT TRANSFER
ADV HETEROCYCL CHEM	ADVANCES IN HETEROCYCLIC CHEMISTRY
ADV HOLOGR	ADVANCES IN HOLOGRAPHY
ADV HUM GENET	ADVANCES IN HUMAN GENETICS
ADV HYDROSCI	ADVANCES IN HYDROSCIENCE
ADV IMMUNOL	ADVANCES IN IMMUNOLOGY
ADV INORG CHEM RAD	ADVANCES IN INORGANIC CHEMISTRY & RADIOCHEMISTRY
ADV INSECT PHYSIOL	ADVANCES IN INSECT PHYSIOLOGY
ADV INTERNAL MED	ADVANCES IN INTERNAL MEDICINE
ADV LIPID RES	ADVANCES IN LIPID RESEARCH
ADV LIQUID CRYSTALS	ADVANCES IN LIQUID CRYSTALS
ADV MACROMOL CHEM	ADVANCES IN MACROMOLECULAR CHEMISTRY
ADV MAGN RESON	ADVANCES IN MAGNETIC RESONANCE
ADV MANAG CLIN HEART	ADVANCES IN THE MANAGEMENT OF CLINICAL HEART DISEASE
ADV MAR BIOL	ADVANCES IN MARINE BIOLOGY
ADV MATER DEVICE RES	ADVANCES IN MATERIALS AND DEVICE RESEARCH
ADV MATH	ADVANCES IN MATHEMATICS

ABBREVIATION	FULL TITLE
ADV METAB DISORD	ADVANCES IN METABOLIC DISORDERS
ADV MICROB PHYSIOL	ADVANCES IN MICROBIAL PHYSIOLOGY
ADV MICROCIRCULAT	ADVANCES IN MICROCIRCULATION
ADV MICROWAVES	ADVANCES IN MICROWAVES
ADV MOL RELAX INT PR	ADVANCES IN MOLECULAR RELAXATION AND INTERACTION PROCESSES
ADV MORPHOGEN	ADVANCES IN MORPHOGENESIS
ADV NEPHROL	ADVANCES IN NEPHROLOGY
ADV NEUROL	ADVANCES IN NEUROLOGY
ADV NUCL SCI TECHNOL	ADVANCES IN NUCLEAR SCIENCE AND TECHNOLOGY
ADV OPHTHALMOL	ADVANCES IN OPHTHALMOLOGY
ADV OPT ELECTRON MIC	ADVANCES IN OPTICAL & ELECTRON MICROSCOPY
ADV ORAL BIOL	ADVANCES IN ORAL BIOLOGY
ADV ORG CHEM	ADVANCES IN ORGANIC CHEMISTRY-METHODS AND RESULTS
ADV ORGANOMET CHEM	ADVANCES IN ORGANOMETALLIC CHEMISTRY
ADV OTO-RHINO-LARYNG	ADVANCES IN OTO-RHINO-LARYNGOLOGY
ADV PARASIT	ADVANCES IN PARASITOLOGY
ADV PEDIATR	ADVANCES IN PEDIATRICS
ADV PHARM SCI	ADVANCES IN PHARMACEUTICAL SCIENCES
ADV PHARMACOL CHEMOT	ADVANCES IN PHARMACOLOGY & CHEMOTHERAPY
ADV PHOTOCHEM	ADVANCES IN PHOTOCHEMISTRY
ADV PHYS	ADVANCES IN PHYSICS
ADV PHYS ORG CHEM	ADVANCES IN PHYSICAL ORGANIC CHEMISTRY
ADV POLYM SCI	ADVANCES IN POLYMER SCIENCE
ADV PROSTAG THROMB R	ADVANCES IN PROSTAGLANDIN AND THROMBOXANE RESEARCH
ADV PROSTAGLAND RES	ADVANCES IN PROSTAGLANDIN RESEARCH
ADV PROTEIN CHEM	ADVANCES IN PROTEIN CHEMISTRY
ADV PSYCHOBIOL	ADVANCES IN PSYCHOBIOLOGY
ADV PSYCHOSOM MED	ADVANCES IN PSYCHOSOMATIC MEDICINE
ADV QUANTUM CHEM	ADVANCES IN QUANTUM CHEMISTRY
ADV QUANTUM ELECTRON	ADVANCES IN QUANTUM ELECTRONICS
ADV RADIAT BIOL	ADVANCES IN RADIATION BIOLOGY
ADV RADIAT CHEM	ADVANCES IN RADIATION CHEMISTRY
ADV REPROD PHYSIOL	ADVANCES IN REPRODUCTIVE PHYSIOLOGY
ADV SLEEP RES	ADVANCES IN SLEEP RESEARCH
ADV SOLID STATE PHYS	ADVANCES IN SOLID STATE PHYSICS
ADV SPACE SCI TECH	ADVANCES IN SPACE SCIENCE AND TECHNOLOGY
ADV STEROID BIOCHEM	ADVANCES IN STEROID BIOCHEMISTRY AND PHARMACOLOGY
ADV STUDY BEHAV	ADVANCES IN THE STUDY OF BEHAVIOR
ADV SURG	ADVANCES IN SURGERY
ADV TUBERC RES	ADVANCES IN TUBERCULOSIS RESEARCH
ADV URETHANE SCI TEC	ADVANCES IN URETHANE SCIENCE AND TECHNOLOGY
ADV VET SCI COMP MED	ADVANCES IN VETERINARY SCIENCE & COMPARATIVE MEDICINE
ADV VIRUS RES	ADVANCES IN VIRUS RESEARCH
AERONAUT J	AERONAUTICAL JOURNAL
AERONAUT QUART	AERONAUTICAL QUARTERLY
AEROSPACE MED	AEROSPACE MEDICINE
AESTHET PLAST SURG	AESTHETIC PLASTIC SURGERY
AEU-ARCH ELEKTRON UB	AEU-ARCHIV FUR ELEKTRONIK UND UBERTRAGUNGSTECHNIK/ELECTRONICS AND COMMUNICATION
AFR AFF	AFRICAN AFFAIRS (THE JOURNAL OF THE ROYAL AFRICAN SOCIETY)
AFR DIG	AFRICA DIGEST
AFR J MED MED SCI	AFRICAN JOURNAL OF MEDICINE AND MEDICAL SCIENCES
AFR REV	AFRICAN REVIEW
AFR SOC RES	AFRICAN SOCIAL RESEARCH
AFR STUD	AFRICAN STUDIES
AFR TODAY	AFRICA TODAY
AFRICA	AFRICA
AFRO-AM STUD	AFRO-AMERICAN STUDIES
AG CHEM COMM FERTIL	AG CHEM AND COMMERCIAL FERTILIZER
AGENTS ACTIONS	AGENTS AND ACTIONS
AGGRESSIVE BEHAV	AGGRESSIVE BEHAVIOR
AGR ADMIN	AGRICULTURAL ADMINISTRATION
AGR AVIAT	AGRICULTURAL AVIATION
AGR BIOL CHEM TOKYO	AGRICULTURAL AND BIOLOGICAL CHEMISTRY
AGR ECON RES	AGRICULTURAL ECONOMICS RESEARCH
AGR EDUC	AGRICULTURAL EDUCATION
AGR ENG	AGRICULTURAL ENGINEERING
AGR HORTIQUE GENET	AGRI HORTIQUE GENETICA
AGR METEOROL	AGRICULTURAL METEOROLOGY
AGR RES	AGRICULTURAL RESEARCH
AGR SCI REV	AGRICULTURAL SCIENCE REVIEW
AGRESSOLOGIE	AGRESSOLOGIE
AGROCHIMICA	AGROCHIMICA
AGRON J	AGRONOMY JOURNAL
AIAA J	AIAA JOURNAL
AICHE J	AICHE JOURNAL (AMERICAN INSTITUTE OF CHEMICAL ENGINEERS)
AIRCRAFT ENG	AIRCRAFT ENGINEERING
AJIA KEIZAI	AJIA KEIZAI. JOURNAL OF THE INSTITUTE OF DEVELOPING ECONOMICS
AKTUEL CHIR	AKTUELLE CHIRURGIE
AKTUEL GERONTOL	AKTUELLE GERONTOLOGIE
AKTUEL TRAUMATOL	AKTUELLE TRAUMATOLOGIE
AKTUEL UROL	AKTUELLE UROLOGIE
ALA J MED SCI	ALABAMA JOURNAL OF MEDICAL SCIENCES
ALASKA MED	ALASKA MEDICINE
ALBERTA J EDUC RES	ALBERTA JOURNAL OF EDUCATIONAL RESEARCH
ALCOHOL CLIN EXP RES	ALCOHOLISM-CLINICAL AND EXPERIMENTAL RESEARCH
ALICYCLIC CHEM-SPR	ALICYCLIC CHEMISTRY-SPECIALIST PERIODICAL REPORTS
ALIPHATIC CHEM-SPR	ALIPHATIC CHEMISTRY-SPECIALIST PERIODICAL REPORTS
ALLERGOL IMMUNOPATH	ALLERGOLOGIA ET IMMUNOPATHOLOGIA
AM ACA POL SOC SCI M	AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE MONOGRAPHS
AM ANN DEAF	AMERICAN ANNALS OF THE DEAF
AM ANTHROPOL	AMERICAN ANTHROPOLOGIST
AM ANTIQUITY	AMERICAN ANTIQUITY
AM ARCH REHABIL TH	AMERICAN ARCHIVES OF REHABILITATION THERAPY
AM ARCHIVIST	AMERICAN ARCHIVIST
AM BANKRUPT LAW J	AMERICAN BANKRUPTCY LAW JOURNAL
AM BAR ASSOC J	AMERICAN BAR ASSOCIATION JOURNAL
AM BAR FOUND RES J	AMERICAN BAR FOUNDATION RESEARCH JOURNAL

AM SCHOLAR	AMERICAN SCHOLAR
AM SCI	AMERICAN SCIENTIST
AM SOCIOL	AMERICAN SOCIOLOGIST
AM SOCIOL REV	AMERICAN SOCIOLOGICAL REVIEW
AM STAT	AMERICAN STATISTICIAN
AM SURGEON	AMERICAN SURGEON
AM VOCATIONAL J	AMERICAN VOCATIONAL JOURNAL
AM WEST	AMERICAN WEST
AM ZOOL	AMERICAN ZOOLOGIST
AMERICAS	AMERICAS
AN ACAD BRAS CIENC	ANAIS DA ACADEMIA BRASILEIRA DE CIENCIAS
AN ANAT	ANALES DE ANATOMIA
AN ASOC QUIM ARGENT	ANALES DE LA ASOCIACION QUIMICA ARGENTINA
AN ESP PEDIATR	ANALES ESPANOLES DE PEDIATRIA
AN FIS	ANALES DE FISICA
AN QUIM	ANALES DE QUIMICA
ANAESTH INTENSIVE CA	ANAESTHESIA AND INTENSIVE CARE
ANAESTHESIA	ANAESTHESIA
ANAESTHESIST	ANAESTHESIST
ANAL BIOCHEM	ANALYTICAL BIOCHEMISTRY
ANAL CHEM	ANALYTICAL CHEMISTRY
ANAL CHIM ACTA	ANALYTICA CHIMICA ACTA
ANAL LETT	ANALYTICAL LETTERS
ANALUSIS	ANALUSIS
ANALYST	ANALYST

ABBREVIATION	FULL TITLE
ANAT ANZEIGER	ANATOMISCHER ANZEIGER
ANAT EMBRYOL	ANATOMY AND EMBRYOLOGY-ZEITSCHRIFT FUR ANATOMIE UND ENTWICKLUNGSGESCHICHTE
ANAT REC	ANATOMICAL RECORD
ANDROLOGIA	ANDROLOGIA
ANESTH ANALG CURR RE	ANESTHESIA AND ANALGESIA, CURRENT RESEARCHES
ANESTH ANALG REANIM	ANESTHESIE, ANALGESIE, REANIMATION
ANESTHESIOLOGY	ANESTHESIOLOGY
ANGEW BOT	ANGEWANDTE BOTANIK
ANGEW CHEM INT EDIT	ANGEWANDTE CHEMIE, INTERNATIONAL EDITION IN ENGLISH
ANGEW CHEM-GER EDIT	ANGEWANDTE CHEMIE
ANGEW INFORM	ANGEWANDTE INFORMATIK
ANGEW MAKROMOL CHEM	ANGEWANDTE MAKROMOLEKULARE CHEMIE
ANGIOLOGICA	ANGIOLOGICA
ANGIOLOGY	ANGIOLOGY
ANGLE ORTHOD	ANGLE ORTHODONTIST
ANIM BEHAV	ANIMAL BEHAVIOUR
ANIM LEARN BEHAV	ANIMAL LEARNING AND BEHAVIOR
ANIM PROD	ANIMAL PRODUCTION
ANN AGRON	ANNALES AGRONOMIQUES
ANN ALLERGY	ANNALS OF ALLERGY
ANN AM ACAD POLIT SS	ANNALS OF THE AMERICAN ACADEMY POLITICAL AND SOCIAL SCIENCE
ANN AMELIOR PLANT	ANNALES DE L'AMELIORATION DES PLANTES
ANN ANAT PATHOL	ANNALES D'ANATOMIE PATHOLOGIQUE
ANN ANESTHESIOL FR	ANNALES DE L'ANESTHESIOLOGIE FRANCAISE
ANN APPL BIOL	ANNALS OF APPLIED BIOLOGY
ANN ASSOC AM GEOGR	ANNALS OF THE ASSOCIATION OF AMERICAN GEOGRAPHERS
ANN BIOL ANIM BIOCH	ANNALES DE BIOLOGIE ANIMALE BIOCHIMIE BIOPHYSIQUE
ANN BIOL CLIN-PARIS	ANNALES DE BIOLOGIE CLINIQUE
ANN BIOL-PARIS	ANNEE BIOLOGIQUE
ANN BIOMED ENG	ANNALS OF BIOMEDICAL ENGINEERING
ANN BOT-LONDON	ANNALS OF BOTANY
ANN CARDIOL ANGEIOL	ANNALES DE CARDIOLOGIE ET D'ANGEIOLOGIE
ANN CHIM-PARIS	ANNALES DE CHIMIE
ANN CHIM-ROME	ANNALI DI CHIMICA
ANN CHIR	ANNALES DE CHIRURGIE
ANN CHIR GYNAECOL FE	ANNALES CHIRURGIAE ET GYNAECOLOGIAE FENNIAE
ANN CHIR INFANT	ANNALES DE CHIRURGIE INFANTILE
ANN CHIR PLAST	ANNALES DE CHIRURGIE PLASTIQUE
ANN CLIN BIOCHEM	ANNALS OF CLINICAL BIOCHEMISTRY
ANN CLIN LAB SCI	ANNALS OF CLINICAL LABORATORY SCIENCE
ANN CLIN RES	ANNALS OF CLINICAL RESEARCH
ANN DERMATOL VENER	ANNALES DE DERMATOLOGIE ET DE VENEREOLOGIE
ANN ECON SOC CIVIL	ANNALES-ECONOMIES SOCIETES CIVILISATIONS
ANN ECON SOC MEAS	ANNALS OF ECONOMIC AND SOCIAL MEASUREMENT
ANN ECON SOC RURAL	ANNALES D'ECONOMIE ET DE SOCIOLOGIE RURALES
ANN EMBRYOL MORPHOG	ANNALES D'EMBRYOLOGIE ET DE MORPHOGENESE
ANN ENDOCRINOL-PARIS	ANNALES D'ENDOCRINOLOGIE
ANN ENTOMOL SOC AM	ANNALS OF THE ENTOMOLOGICAL SOCIETY OF AMERICA
ANN GASTROENT HEPATO	ANNALES DE GASTROENTEROLOGIE ET D'HEPATOLOGIE
ANN GENET-PARIS	ANNALES DE GENETIQUE
ANN GEOGR	ANNALES DE GEOGRAPHIE
ANN GEOPHYS-PARIS	ANNALES DE GEOPHYSIQUE
ANN HISTOCHIM	ANNALES D'HISTOCHIMIE
ANN HUM BIOL	ANNALS OF HUMAN BIOLOGY
ANN HUM GENET	ANNALS OF HUMAN GENETICS
ANN HYDROBIOL	ANNALES D'HYDROBIOLOGIE
ANN I FOURIER	ANNALES DE L'INSTITUT FOURIER
ANN I H POINCARE A	ANNALES DE L'INSTITUT HENRI POINCARE. SECTION A. PHYSIQUE THEORIQUE
ANN I H POINCARE B	ANNALES DE L'INSTITUT HENRI POINCARE. SECTION B. CALCUL DES PROBABILITES ET STATISTIQUE
ANN I OCEANOGR PARIS	ANNALES DE L'INSTITUT OCEANOGRAPHIQUE
ANN I PASTEUR PARIS	ANNALES DE L'INSTITUT PASTEUR, PARIS
ANN I STAT MATH	ANNALS OF THE INSTITUTE OF STATISTICAL MATHEMATICS
ANN IMMUNOL	ANNALES D'IMMUNOLOGIE
ANN INTERN MED	ANNALS OF INTERNAL MEDICINE
ANN MATH	ANNALS OF MATHEMATICS
ANN MATH STAT	ANNALS OF MATHEMATICAL STATISTICS
ANN MED EXP BIOL FEN	ANNALES MEDICINAE EXPERIMENTALIS ET BIOLOGIAE FENNIAE
ANN MED INTERNE	ANNALES DE MEDECINE INTERNE
ANN MED-PSYCHOL	ANNALES MEDICO-PSYCHOLOGIQUES
ANN MICROBIOL-PARIS	ANNALES DE MICROBIOLOGIE-INSTITUT PASTEUR
ANN MO BOT GARD	ANNALS OF THE MISSOURI BOTANICAL GARDEN
ANN NEUROL	ANNALS OF NEUROLOGY
ANN NUCL ENERGY	ANNALS OF NUCLEAR ENERGY
ANN NUCL SCI ENG	ANNALS OF NUCLEAR SCIENCE AND ENGINEERING
ANN NUTR ALIMENT	ANNALES DE LA NUTRITION ET DE L'ALIMENTATION
ANN NY ACAD SCI	ANNALS OF THE NEW YORK ACADEMY OF SCIENCES
ANN OCUL	ANNALES D'OCULISTIQUE
ANN OPHTHALMOL	ANNALS OF OPHTHALMOLOGY
ANN OTO RHINOL LARYN	ANNALS OF OTOLOGY, RHINOLOGY AND LARYNGOLOGY
ANN OTO-LAR CHIR C-F	ANNALES D'OTO-LARYNGOLOGIE ET DE CHIRURGIE CERVICO-FACIALE
ANN PAEDIATR JAPON	ANNALES PAEDIATRICI JAPONICI
ANN PHARM FR	ANNALES PHARMACEUTIQUES FRANCAISES
ANN PHENOMEN SOCIOL	ANNALS OF PHENOMENOLOGICAL SOCIOLOGY
ANN PHYS-LEIPZIG	ANNALEN DER PHYSIK
ANN PHYS-NEW YORK	ANNALS OF PHYSICS
ANN PHYS-PARIS	ANNALES DE PHYSIQUE
ANN PROBAB	ANNALS OF PROBABILITY
ANN PSYCHOL	ANNEE PSYCHOLOGIQUE
ANN PUBLIC COOP ECON	ANNALS OF PUBLIC AND CO-OPERATIVE ECONOMY
ANN RADIOL	ANNALES DE RADIOLOGIE
ANN RECH VET	ANNALES DE RECHERCHES VETERINAIRES
ANN REGIONAL SCI	ANNALS OF REGIONAL SCIENCE
ANN RHEUM DIS	ANNALS OF THE RHEUMATIC DISEASES
ANN ROY COLL SURG	ANNALS OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND
ANN SCI	ANNALS OF SCIENCE
ANN SCI ECOLE NORM S	ANNALES SCIENTIFIQUES DE L'ECOLE NORMALE SUPERIEURE
ANN SCI NAT ZOOL	ANNALES DES SCIENCES NATURELLES ZOOLOGIE ET BIOLOGIE ANIMALE
ANN SCLAVO	ANNALI SCLAVO
ANN SOC BELG MED TR	ANNALES DE LA SOCIETE BELGE DE MEDECINE TROPICALE
ANN SOC ENTOMOL FR	ANNALES DE LA SOCIETE ENTOMOLOGIQUE DE FRANCE
ANN SOC SCI BRUX	ANNALES DE LA SOCIETE SCIENTIFIQUE DE BRUXELLES SERIE 1. SCIENCES MATHEMATIQUES, ASTRONOMIQUES ET PHYSIQUES
ANN STAT	ANNALS OF STATISTICS
ANN SURG	ANNALS OF SURGERY
ANN TECHNOL AGR	ANNALES DE TECHNOLOGIE AGRICOLE

ABBREVIATION	FULL TITLE
ANN TELECOMMUN	ANNALES DES TELECOMMUNICATIONS
ANN THORAC SURG	ANNALS OF THORACIC SURGERY
ANN TROP MED PARASIT	ANNALS OF TROPICAL MEDICINE AND PARASITOLOGY
ANN UROL	ANNALES D'UROLOGIE
ANN ZOOTECH	ANNALES DE ZOOTECHNIE
ANNU REP MED CHEM	ANNUAL REPORTS IN MEDICINAL CHEMISTRY
ANNU REP NMR SPECTRO	ANNUAL REPORTS ON NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY
ANNU REP PROG CHEM A	ANNUAL REPORTS ON THE PROGRESS OF CHEMISTRY. SECTION A. PHYSICAL AND INORGANIC
ANNU REP PROG CHEM B	ANNUAL REPORTS ON THE PROGRESS OF CHEMISTRY. SECTION B. ORGANIC
ANNU REV ANTHROPOL	ANNUAL REVIEW OF ANTHROPOLOGY
ANNU REV ASTRON ASTR	ANNUAL REVIEW OF ASTRONOMY AND ASTROPHYSICS
ANNU REV BIOCHEM	ANNUAL REVIEW OF BIOCHEMISTRY
ANNU REV BIOPHYS BIO	ANNUAL REVIEW OF BIOPHYSICS AND BIOENGINEERING
ANNU REV EARTH PL SC	ANNUAL REVIEW OF EARTH AND PLANETARY SCIENCE
ANNU REV ECOL SYST	ANNUAL REVIEW OF ECOLOGY AND SYSTEMATICS
ANNU REV ENERGY	ANNUAL REVIEW OF ENERGY
ANNU REV ENTOMOL	ANNUAL REVIEW OF ENTOMOLOGY
ANNU REV FLUID MECH	ANNUAL REVIEW OF FLUID MECHANICS
ANNU REV GENET	ANNUAL REVIEW OF GENETICS
ANNU REV INFORM SCI	ANNUAL REVIEW OF INFORMATION SCIENCE AND TECHNOLOGY
ANNU REV MATER SCI	ANNUAL REVIEW OF MATERIALS SCIENCE
ANNU REV MED	ANNUAL REVIEW OF MEDICINE
ANNU REV MICROBIOL	ANNUAL REVIEW OF MICROBIOLOGY
ANNU REV NUCL SCI	ANNUAL REVIEW OF NUCLEAR SCIENCE
ANNU REV PHARMACOL	ANNUAL REVIEW OF PHARMACOLOGY AND TOXICOLOGY
ANNU REV PHYS CHEM	ANNUAL REVIEW OF PHYSICAL CHEMISTRY
ANNU REV PHYSIOL	ANNUAL REVIEW OF PHYSIOLOGY
ANNU REV PHYTOPATHOL	ANNUAL REVIEW OF PHYTOPATHOLOGY
ANNU REV PLANT PHYS	ANNUAL REVIEW OF PLANT PHYSIOLOGY
ANNU REV PSYCHOL	ANNUAL REVIEW OF PSYCHOLOGY
ANNU REV SOCIOL	ANNUAL REVIEW OF SOCIOLOGY
ANTARCT J US	ANTARCTIC JOURNAL OF THE UNITED STATES
ANTHROPOL J CAN	ANTHROPOLOGICAL JOURNAL OF CANADA
ANTHROPOL KOZLEM	ANTHROPOLOGIAIE KOZLEMENYK-ANTHROPOLOGICAL COMMUNICATIONS
ANTHROPOL LINGUIST	ANTHROPOLOGICAL LINGUISTICS
ANTHROPOL PAP AM MUS	ANTHROPOLOGICAL PAPERS OF THE AMERICAN MUSEUM OF NATURAL HISTORY

AUST GEOGR	AUSTRALIAN GEOGRAPHER
AUST GEOGR STUD	AUSTRALIAN GEOGRAPHICAL STUDIES
AUST J ADULT EDUC	AUSTRALIAN JOURNAL OF ADULT EDUCATION
AUST J AGR ECON	AUSTRALIAN JOURNAL OF AGRICULTURAL ECONOMICS
AUST J AGR RES	AUSTRALIAN JOURNAL OF AGRICULTURAL RESEARCH
AUST J BIOL SCI	AUSTRALIAN JOURNAL OF BIOLOGICAL SCIENCES
AUST J BOT	AUSTRALIAN JOURNAL OF BOTANY
AUST J CHEM	AUSTRALIAN JOURNAL OF CHEMISTRY
AUST J DAIRY TECHNOL	AUSTRALIAN JOURNAL OF DAIRY TECHNOLOGY
AUST J ECOL	AUSTRALIAN JOURNAL OF ECOLOGY

ABBREVIATION	FULL TITLE
AUST J EDUC	AUSTRALIAN JOURNAL OF EDUCATION
AUST J EXP AGR ANIM	AUSTRALIAN JOURNAL OF EXPERIMENTAL AGRICULTURE AND ANIMAL HUSBANDRY
AUST J EXP BIOL MED	AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE
AUST J INSTRUM CONTR	AUSTRALIAN JOURNAL OF INSTRUMENTATION AND CONTROL
AUST J MAR FRESH RES	AUSTRALIAN JOURNAL OF MARINE AND FRESHWATER RESEARCH
AUST J PHYS	AUSTRALIAN JOURNAL OF PHYSICS
AUST J PLANT-PHYSIOL	AUSTRALIAN JOURNAL OF PLANT PHYSIOLOGY
AUST J POLIT HIST	AUSTRALIAN JOURNAL OF POLITICS AND HISTORY
AUST J PSYCHOL	AUSTRALIAN JOURNAL OF PSYCHOLOGY
AUST J SOC ISSUES	AUSTRALIAN JOURNAL OF SOCIAL ISSUES
AUST J SOIL RES	AUSTRALIAN JOURNAL OF SOIL RESEARCH
AUST J STAT	AUSTRALIAN JOURNAL OF STATISTICS
AUST J ZOOL	AUSTRALIAN JOURNAL OF ZOOLOGY
AUST NZ J CRIMINOL	AUSTRALIAN AND NEW ZEALAND JOURNAL OF CRIMINOLOGY
AUST NZ J MED	AUSTRALIAN AND NEW ZEALAND JOURNAL OF MEDICINE
AUST NZ J OBSTET GYN	AUSTRALIAN AND NEW ZEALAND JOURNAL OF OBSTETRICS AND GYNAECOLOGY
AUST NZ J PSYCHIAT	AUSTRALIAN AND NEW ZEALAND JOURNAL OF PSYCHIATRY
AUST NZ J SOCIOL	AUSTRALIAN AND NEW ZEALAND JOURNAL OF SOCIOLOGY
AUST NZ J SURG	AUSTRALIAN AND NEW ZEALAND JOURNAL OF SURGERY
AUST OUTLOOK	AUSTRALIAN OUTLOOK
AUST PAEDIATR J	AUSTRALIAN PAEDIATRIC JOURNAL
AUST PSYCHOL	AUSTRALIAN PSYCHOLOGIST
AUST QUART	AUSTRALIAN QUARTERLY
AUST TEACH DEAF	AUSTRALIAN TEACHER OF THE DEAF
AUST VET J	AUSTRALIAN VETERINARY JOURNAL
AUST VET PRACT	AUSTRALIAN VETERINARY PRACTITIONER
AUSTRALAS RADIOL	AUSTRALASIAN RADIOLOGY
AUTOMAT REM CONTR*	AUTOMATION AND REMOTE CONTROL, USSR
AUTOMAT WELD*	AUTOMATIC WELDING USSR
AUTOMATICA	AUTOMATICA
AUTOMATISME	AUTOMATISME
AUTOMOT ENG	AUTOMOTIVE ENGINEERING
AUTOMOT IND	AUTOMOTIVE INDUSTRIES
AV COMMUN REV	AV COMMUNICATION REVIEW
AVIAN DIS	AVIAN DISEASES
AVIAT SPACE ENVIR MD	AVIATION SPACE AND ENVIRONMENTAL MEDICINE
AVTOM TELEMEKH*	AVTOMATIKA I TELEMEKHANIKA
B ACAD NAT MED PARIS	BULLETIN DE L'ACADEMIE NATIONALE DE MEDECINE, PARIS
B ACAD POL SCI BIOL	BULLETIN DE L'ACADEMIE POLONAISE DES SCIENCES. SERIE DES SCIENCES BIOLOGIQUES
B ACAD POL SCI CHIM	BULLETIN DE L'ACADEMIE POLONAISE DES SCIENCES. SERIE DES SCIENCES CHIMIQUE
B ACAD POL SCI SMAP	BULLETIN DE L'ACADEMIE POLONAISE DES SCIENCES. SERIE DES SCIENCES MATHEMATIQUES, ASTRONOMIQUES ET PHYSIQUES
B ACAD POL SCI TECH	BULLETIN DE L'ACADEMIE POLONAISE DES SCIENCES. SERIE DES SCIENCES TECHNIQUES
B ACAD POL SCI TERRE	BULLETIN DE L'ACADEMIE POLONAISE DES SCIENCES. SERIE DES SCIENCES DE LA TERRE
B ACAD SCI USSR CH*	BULLETIN OF THE ACADEMY OF SCIENCES OF THE USSR DIVISION OF CHEMICAL SCIENCE
B AM ANTHROPOL ASSOC	BULLETIN OF THE AMERICAN ANTHROPOLOGICAL ASSOCIATION
B AM COLL SURG	BULLETIN OF THE AMERICAN COLLEGE OF SURGEONS
B AM MATH SOC	BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY
B AM METEOROL SOC	BULLETIN OF THE AMERICAN METEOROLOGICAL SOCIETY
B AM PHYS SOC	BULLETIN OF THE AMERICAN PHYSICAL SOCIETY
B ASTRON I CZECH	BULLETIN OF THE ASTRONOMICAL INSTITUTES OF CZECHOSLOVAKIA
B ATOM SCI	BULLETIN OF THE ATOMIC SCIENTISTS
B BRIT PSYCHOL SOC	BULLETIN OF THE BRITISH PSYCHOLOGICAL SOCIETY
B CANCER	BULLETIN DU CANCER
B CHEM SOC JPN	BULLETIN OF THE CHEMICAL SOCIETY OF JAPAN
B CL SCI AC ROY BELG	BULLETIN DE LA CLASSE DES SCIENCES. ACADEMIE ROYALE DE BELGIQUE
B CONCERN ASIA SCHOL	BULLETIN OF CONCERNED ASIAN SCHOLARS
B COPYRIGHT SOC USA	BULLETIN OF THE COPYRIGHT SOCIETY OF THE U.S.A

B INT FISCAL DOC	BULLETIN FOR INTERNATIONAL FISCAL DOCUMENTATION
B JOHNS HOPKINS HOSP	BULLETIN OF THE JOHNS HOPKINS HOSPITAL
B JPN SOC SCI FISH	BULLETIN OF THE JAPANESE SOCIETY OF SCIENTIFIC FISHERIES
B JSME	BULLETIN OF THE JSME-JAPAN SOCIETY OF MECHANICAL ENGINEERS
B MAR SCI	BULLETIN OF MARINE SCIENCE
B MATH BIOL	BULLETIN OF MATHEMATICAL BIOLOGY
B MED LEG URGE MED	BULLETIN DE MEDECINE LEGALE URGENCE MEDICALE CENTRE ANTI-POISONS
B MED LIBR ASSOC	BULLETIN OF THE MEDICAL LIBRARY ASSOCIATION
B MEM SOC ANTHRO PAR	BULLETINS ET MEMOIRES DE LA SOCIETE D'ANTHROPOLOGIE DE PARIS
B MENNINGER CLIN	BULLETIN OF THE MENNINGER CLINIC
B NARCOTICS	BULLETIN ON NARCOTICS
B NEW YORK ACAD MED	BULLETIN OF THE NEW YORK ACADEMY OF MEDICINE
B OFIC SANIT PANAM	BOLETIN DE LA OFICINA SANITARIA PANAMERICANA
B PEACE PROPOSALS	BULLETIN OF PEACE PROPOSALS
B PHYSIO-PATHOL RESP	BULLETIN DE PHYSIO-PATHOLOGIE RESPIRATOIRE
B PSYCHOL	BULLETIN DE PSYCHOLOGIE
B PSYCHOL SCOL ORIEN	BULLETIN DE PSYCHOLOGIE SCOLAIRE ET D'ORIENTATION
B PSYCHONOMIC SOC	BULLETIN OF THE PSYCHONOMIC SOCIETY
B RURAL ECON SOCIOL	BULLETIN OF RURAL ECONOMICS AND SOCIOLOGY
B SCHWEIZ AKAD MED	BULLETIN DER SCHWEIZERISCHEN AKADEMIE DER MEDIZINISCHEN WISSENSCHAFTEN
B SCI MATH	BULLETIN DES SCIENCES MATHEMATIQUES
B SEISMOL SOC AM	BULLETIN OF THE SEISMOLOGICAL SOCIETY OF AMERICA
B SOC BOT FR	BULLETIN DE LA SOCIETE BOTANIQUE DE FRANCE

ABBREVIATION	FULL TITLE
B SOC BOT SUISSE	BULLETIN DE LA SOCIETE BOTANIQUE SUISSE
B SOC CHIM BELG	BULLETIN DES SOCIETES CHIMIQUES BELGES
B SOC CHIM BIOL	BULLETIN DE LA SOCIETE DE CHIMIE BIOLOGIQUE
B SOC CHIM FR	BULLETIN DE LA SOCIETE CHIMIQUE DE FRANCE
B SOC FR CERAM	BULLETIN DE LA SOCIETE FRANCAISE DE CERAMIQUE
B SOC FR MINERAL CR	BULLETIN DE LA SOCIETE FRANCAISE DE MINERALOGIE ET DE CRISTALLOGRAPHIE
B SOC MATH FR	BULLETIN DE LA SOCIETE MATHEMATIQUE DE FRANCE
B SOC ZOOL FR	BULLETIN DE LA SOCIETE ZOOLOGIQUE DE FRANCE
B TORREY BOT CLUB	BULLETIN OF THE TORREY BOTANICAL CLUB
B WORLD HEALTH ORGAN	BULLETIN OF THE WORLD HEALTH ORGANIZATION
BACTERIOL REV	BACTERIOLOGICAL REVIEWS
BALL BEARING J	BALL BEARING JOURNAL
BANKING LAW J	BANKING LAW JOURNAL
BARCLAYS REV	BARCLAYS REVIEW
BASIC RES CARDIOL	BASIC RESEARCH IN CARDIOLOGY
BATTELLE MONOGR	BATTELLE MONOGRAPHS
BAYLOR LAW REV	BAYLOR LAW REVIEW
BEHAV BIOL	BEHAVIORAL BIOLOGY
BEHAV ECOL SOCIOBIOL	BEHAVIORAL ECOLOGY AND SOCIOBIOLOGY
BEHAV GENET	BEHAVIOR GENETICS
BEHAV PROCESS	BEHAVIOURAL PROCESSES
BEHAV RES METH INSTR	BEHAVIOR RESEARCH METHODS AND INSTRUMENTATION
BEHAV RES THER	BEHAVIOUR RESEARCH AND THERAPY
BEHAV SCI	BEHAVIORAL SCIENCE
BEHAV SCI NOTES	BEHAVIOR SCIENCE NOTES
BEHAV SCI RES	BEHAVIOR SCIENCE RESEARCH
BEHAV THER	BEHAVIOR THERAPY
BEHAVIOUR	BEHAVIOUR
BEITR KONFLIKTFORSCH	BEITRAGE ZUR KONFLIKTFORSCHUNG
BEITR MEERESKD	BEITRAGE ZUR MEERESKUNDE
BEITR PATHOL	BEITRAGE ZUR PATHOLOGIE
BELL J ECON MANAGE S	BELL JOURNAL OF ECONOMICS AND MANAGEMENT SCIENCE
BELL LAB REC	BELL LABORATORIES RECORD
BELL SYST TECH J	BELL SYSTEM TECHNICAL JOURNAL
BER BUNSEN PHYS CHEM	BERICHTE DER BUNSEN GESELLSCHAFT FUR PHYSIKALISCHE CHEMIE
BER DEUT BOT GES	BERICHTE DER DEUTSCHEN BOTANISCHEN GESELLSCHAFT
BER DEUT CHEM GES	BERICHTE DER DEUTSCHEN CHEMISCHEN GESELLSCHAFT
BERUFS-DERMATOSEN	BERUFS-DERMATOSEN
BETRIEB	BETRIEB
BETRIEB FORSCH PRAX	BETRIEBSWIRTSCHAFTLICHE FORSCHUNG UND PRAXIS
BETRIEBSWIRT	BETRIEBSWIRT
BIBL ANAT	BIBLIOTHECA ANATOMICA
BIBL CARDIOL	BIBLIOTHECA CARDIOLOGICA
BIBL HAEMATOL	BIBLIOTHECA HAEMATOLOGICA
BIBL MICROBIOL	BIBLIOTHECA MICROBIOLOGICA
BIBL NUTR DIET	BIBLIOTHECA NUTRITIO ET DIETA
BIBL OPHTHALMOL	BIBLIOTHECA OPHTHALMOLOGICA
BIBL PHONET	BIBLIOTHECA PHONETICA
BIBL PRIMATOL	BIBLIOTHECA PRIMATOLOGICA
BIBL RADIOL	BIBLIOTHECA RADIOLOGICA
BIKEN J	BIKEN JOURNAL
BIOCHEM ACT HORMONES	BIOCHEMICAL ACTIONS OF HORMONES
BIOCHEM BIOPH RES CO	BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
BIOCHEM GENET	BIOCHEMICAL GENETICS
BIOCHEM J	BIOCHEMICAL JOURNAL
BIOCHEM MED	BIOCHEMICAL MEDICINE
BIOCHEM PHARMACOL	BIOCHEMICAL PHARMACOLOGY
BIOCHEM PHYSIOL PFL	BIOCHEMIE UND PHYSIOLOGIE DER PFLANZEN
BIOCHEM SOC TRANS	BIOCHEMICAL SOCIETY TRANSACTIONS
BIOCHEM SYST ECOL	BIOCHEMICAL SYSTEMATICS AND ECOLOGY
BIOCHEM Z	BIOCHEMISCHE ZEITSCHRIFT
BIOCHEMISTRY-US	BIOCHEMISTRY
BIOCHEMISTRY-USSR*	BIOCHEMISTRY-USSR
BIOCHIM BIOPHYS ACTA	BIOCHIMICA ET BIOPHYSICA ACTA
BIOCHIMIE	BIOCHIMIE
BIOELECTROCH BIOENER	BIOELECTROCHEMISTRY AND BIOENERGETICS
BIOFEEDBACK SELF-REG	BIOFEEDBACK AND SELF-REGULATION
BIOFIZIKA*	BIOFIZIKA
BIOINORG CHEM	BIOINORGANIC CHEMISTRY
BIOKHIMIYA*	BIOKHIMIYA
BIOL BULL	BIOLOGICAL BULLETIN
BIOL CELL	BIOLOGIE CELLULAIRE
BIOL CYBERN	BIOLOGICAL CYBERNETICS
BIOL GASTRO-ENTEROL	BIOLOGIE ET GASTRO-ENTEROLOGIE
BIOL J LINN SOC	BIOLOGICAL JOURNAL OF THE LINNEAN SOCIETY
BIOL NEONATE	BIOLOGY OF THE NEONATE
BIOL PLANTARUM	BIOLOGIA PLANTARUM
BIOL PSYCHIAT	BIOLOGICAL PSYCHIATRY
BIOL PSYCHOL	BIOLOGICAL PSYCHOLOGY
BIOL REPROD	BIOLOGY OF REPRODUCTION
BIOL REV	BIOLOGICAL REVIEWS OF THE CAMBRIDGE PHILOSOPHICAL SOCIETY
BIOL SKR DAN VID SEL	BIOLOGISKE SKRIFTER KONGELIGE DANSKE VIDENSKABERNES SELSKAB
BIOL ZBL	BIOLOGISCHES ZENTRALBLATT
BIOLOGIA	BIOLOGIA
BIOMATER MED DEV ART	BIOMATERIALS MEDICAL DEVICES AND ARTIFICIAL ORGANS
BIOMED ENG	BIOMEDICAL ENGINEERING
BIOMED EXPRESS	BIOMEDICINE EXPRESS
BIOMED MASS SPECTROM	BIOMEDICAL MASS SPECTROMETRY
BIOMED TECH	BIOMEDIZINISCHE TECHNIK
BIOMEDICINE	BIOMEDICINE
BIOMETR Z	BIOMETRISCHE ZEITSCHRIFT
BIOMETRICS	BIOMETRICS
BIOMETRIKA	BIOMETRIKA
BIOORG CHEM	BIOORGANIC CHEMISTRY
BIOORG KHIM	BIOORGANICHESKAYA KHIMIYA
BIOPHYS CHEM	BIOPHYSICAL CHEMISTRY
BIOPHYS J	BIOPHYSICAL JOURNAL
BIOPHYS STRUCT MECH	BIOPHYSICS OF STRUCTURE AND MECHANISM
BIOPHYSIK	BIOPHYSIK
BIOPOLYMERS	BIOPOLYMERS
BIORHEOLOGY	BIORHEOLOGY
BIOSCI COMMUN	BIOSCIENCES COMMUNICATIONS
BIOSCIENCE	BIOSCIENCE
BIOSYSTEMS	BIOSYSTEMS
BIOTECHNOL BIOENG	BIOTECHNOLOGY AND BIOENGINEERING
BIOTELEMETRY	BIOTELEMETRY
BIRD BANDING	BIRD-BANDING

ABBREVIATION	FULL TITLE
BIRD STUDY	BIRD STUDY
BIRTH DEFECTS OAS	BIRTH DEFECTS, ORIGINAL ARTICLE SERIES
BLACK SCHOLAR	BLACK SCHOLAR
BLOOD	BLOOD
BLOOD CELLS	BLOOD CELLS
BLOOD VESSELS	BLOOD VESSELS
BLUT	BLUT
BOSTON U J	BOSTON UNIVERSITY JOURNAL
BOSTON U LAW REV	BOSTON UNIVERSITY LAW REVIEW
BOT BULL ACAD SINICA	BOTANICAL BULLETIN OF ACADEMIA SINICA
BOT GAZ	BOTANICAL GAZETTE
BOT J LINN SOC	BOTANICAL JOURNAL OF THE LINNEAN SOCIETY
BOT MAG TOKYO	BOTANICAL MAGAZINE, TOKYO
BOT MAR	BOTANICA MARINA
BOT NOTISER	BOTANISKA NOTISER
BOT REV	BOTANICAL REVIEW
BOT TIDSSKR	BOTANISK TIDSSKRIFT
BRAIN	BRAIN
BRAIN BEHAV EVOLUT	BRAIN, BEHAVIOR AND EVOLUTION
BRAIN LANG	BRAIN AND LANGUAGE
BRAIN RES	BRAIN RESEARCH
BRAIN RES BULL	BRAIN RESEARCH BULLETIN
BRENNST-WARME-KRAFT	BRENNSTOFF-WARME-KRAFT
BRIT DENT J	BRITISH DENTAL JOURNAL
BRIT HEART J	BRITISH HEART JOURNAL
BRIT J ADDICT	BRITISH JOURNAL OF ADDICTION
BRIT J ANAESTH	BRITISH JOURNAL OF ANAESTHESIA
BRIT J APPL PHYS	BRITISH JOURNAL OF APPLIED PHYSICS
BRIT J CANCER	BRITISH JOURNAL OF CANCER
BRIT J CLIN PHARMACO	BRITISH JOURNAL OF CLINICAL PHARMACOLOGY
BRIT J CLIN PRACT	BRITISH JOURNAL OF CLINICAL PRACTICE
BRIT J CRIMINOL	BRITISH JOURNAL OF CRIMINOLOGY
BRIT J DERMATOL	BRITISH JOURNAL OF DERMATOLOGY
BRIT J DIS CHEST	BRITISH JOURNAL OF DISEASES OF THE CHEST
BRIT J DISORD COMMUN	BRITISH JOURNAL OF DISORDERS OF COMMUNICATION
BRIT J EDUC PSYCHOL	BRITISH JOURNAL OF EDUCATIONAL PSYCHOLOGY
BRIT J EDUC STUD	BRITISH JOURNAL OF EDUCATIONAL STUDIES
BRIT J EDUC TECHNOL	BRITISH JOURNAL OF EDUCATIONAL TECHNOLOGY
BRIT J EXP PATHOL	BRITISH JOURNAL OF EXPERIMENTAL PATHOLOGY

CENT STATES SPEECH J	CENTRAL STATES SPEECH JOURNAL
CENTAURUS	CENTAURUS
CEREAL CHEM	CEREAL CHEMISTRY
CEREAL FOOD WORLD	CEREAL FOODS WORLD
CEREAL SCI TODAY	CEREAL SCIENCE TODAY

A LIST OF THE FULL TITLES OF CITING/CITED JOURNALS

ARRANGED BY ABBREVIATIONS IN ALPHABETIC ORDER

ABBREVIATION	FULL TITLE
CESK CAS FYS*	CESKOSLOVENSKY CASOPIS PRO FYSIKU SEKCE A
CESK PSYCHOL	CESKOSLOVENSKA PSYCHOLOGIE
CHANGE	CHANGE
CHARACT POTENTIAL	CHARACTER POTENTIAL, A RECORD OF RESEARCH
CHEM ANAL-WARSAW	CHEMIA ANALITYCZNA
CHEM BER	CHEMISCHE BERICHTE
CHEM BIOCHEM AMINO	CHEMISTRY AND BIOCHEMISTRY OF AMINO ACIDS PEPTIDES AND PROTEINS
CHEM BRIT	CHEMISTRY IN BRITAIN
CHEM ENG NEWS	CHEMICAL & ENGINEERING NEWS
CHEM ENG PROG	CHEMICAL ENGINEERING PROGRESS
CHEM ENG SCI	CHEMICAL ENGINEERING SCIENCE
CHEM ENG-LONDON	CHEMICAL ENGINEER-LONDON
CHEM ENG-NEW YORK	CHEMICAL ENGINEERING
CHEM GEOL	CHEMICAL GEOLOGY
CHEM IND-LONDON	CHEMISTRY AND INDUSTRY, LONDON
CHEM INSTRUM	CHEMICAL INSTRUMENTATION
CHEM LETT	CHEMISTRY LETTERS
CHEM LISTY	CHEMICKE LISTY
CHEM PHARM BULL	CHEMICAL AND PHARMACEUTICAL BULLETIN
CHEM PHYS	CHEMICAL PHYSICS
CHEM PHYS CARBONS	CHEMISTRY AND PHYSICS OF CARBONS
CHEM PHYS LETT	CHEMICAL PHYSICS LETTERS
CHEM PHYS LIPIDS	CHEMISTRY AND PHYSICS OF LIPIDS
CHEM REV	CHEMICAL REVIEWS
CHEM SCRIPTA	CHEMICA SCRIPTA
CHEM SENSES FLAVOR	CHEMICAL SENSES AND FLAVOR
CHEM SOC REV	CHEMICAL SOCIETY REVIEWS
CHEM TECH-LEIPZIG	CHEMISCHE TECHNIK
CHEM WEEK	CHEMICAL WEEK
CHEM ZTG	CHEMIKER-ZEITUNG
CHEM ZVESTI	CHEMICKE ZVESTI
CHEM-BIOL INTERACT	CHEMICO-BIOLOGICAL INTERACTIONS
CHEM-ING-TECH	CHEMIE-INGENIEUR-TECHNIK
CHEMISTRY	CHEMISTRY
CHEMOSPHERE	CHEMOSPHERE
CHEMOTHERAPY	CHEMOTHERAPY
CHEMTECH	CHEMTECH
CHEST	CHEST
CHILD BRAIN	CHILD'S BRAIN
CHILD CARE HLTH DEV	CHILD CARE HEALTH AND DEVELOPMENT
CHILD CARE QUART	CHILD CARE QUARTERLY
CHILD DEV	CHILD DEVELOPMENT
CHILD PSYCHIAT HUM D	CHILD PSYCHIATRY AND HUMAN DEVELOPMENT
CHILD PSYCHIAT QUART	CHILD PSYCHIATRY QUARTERLY
CHILD STUDY J	CHILD STUDY JOURNAL
CHILD WELFARE	CHILD WELFARE
CHIM IND-MILAN	CHIMICA E L'INDUSTRIA
CHIM THER	CHIMICA THERAPEUTICA
CHIMIA	CHIMIA
CHINA PICT	CHINA PICTORIAL
CHINA QUART	CHINA QUARTERLY
CHINA RECONSTR	CHINA RECONSTRUCTS
CHINESE ECON STUD	CHINESE ECONOMIC STUDIES
CHINESE EDUC	CHINESE EDUCATION
CHINESE LAW GOV	CHINESE LAW AND GOVERNMENT
CHINESE MED J-PEKING	CHINESE MEDICAL JOURNAL (PEKING)
CHINESE SOC ANTHROP	CHINESE SOCIOLOGY AND ANTHROPOLOGY
CHINESE STUD HIST	CHINESE STUDIES IN HISTORY
CHIR PLAST	CHIRURGIA PLASTICA
CHIRURG	CHIRURG
CHIRURGIE	CHIRURGIE
CHROMATOGRAPHIA	CHROMATOGRAPHIA
CHROMOSOMA	CHROMOSOMA
CIM BULL	CIM BULLETIN
CIR ESPAN	CIRURGIA ESPANOLA
CIRC RES	CIRCULATION RESEARCH
CIRC SHOCK	CIRCULATORY SHOCK
CIRCULATION	CIRCULATION
CIVIL ENG	CIVIL ENGINEERING
CIVIL RIGHTS DIG	CIVIL RIGHTS DIGEST
CLAY CLAY MINER	CLAYS AND CLAY MINERALS
CLAY MINER	CLAY MINERALS
CLEARING HOUSE	CLEARING HOUSE
CLEFT PALATE J	CLEFT PALATE JOURNAL
CLEV CLIN QUART	CLEVELAND CLINIC QUARTERLY
CLIMATIC CHANGE	CLIMATIC CHANGE
CLIN ALLERGY	CLINICAL ALLERGY
CLIN BIOCHEM	CLINICAL BIOCHEMISTRY
CLIN BULL	CLINICAL BULLETIN
CLIN CHEM	CLINICAL CHEMISTRY
CLIN CHIM ACTA	CLINICA CHIMICA ACTA
CLIN ELECTROENCEPHAL	CLINICAL ELECTROENCEPHALOGRAPHY
CLIN ENDOCRINOL	CLINICAL ENDOCRINOLOGY
CLIN ENDOCRINOL META	CLINICS IN ENDOCRINOLOGY AND METABOLISM
CLIN EXP DERMATOL	CLINICAL AND EXPERIMENTAL DERMATOLOGY
CLIN EXP IMMUNOL	CLINICAL AND EXPERIMENTAL IMMUNOLOGY
CLIN EXP PHARMACOL P	CLINICAL AND EXPERIMENTAL PHARMACOLOGY AND PHYSIOLOGY
CLIN GASTROENTEROL	CLINICS IN GASTROENTEROLOGY
CLIN GENET	CLINICAL GENETICS
CLIN HAEMATOL	CLINICS IN HAEMATOLOGY
CLIN IMMUNOBIOL	CLINICAL IMMUNOBIOLOGY
CLIN IMMUNOL IMMUNOP	CLINICAL IMMUNOLOGY AND IMMUNOPATHOLOGY
CLIN MED	CLINICAL MEDICINE
CLIN NEPHROL	CLINICAL NEPHROLOGY
CLIN NEUROL NEUROSUR	CLINICAL NEUROLOGY AND NEUROSURGERY
CLIN OBSTET GYNAECOL	CLINICS IN OBSTETRICS AND GYNAECOLOGY
CLIN ONCOL	CLINICAL ONCOLOGY
CLIN ORTHOP RELAT R	CLINICAL ORTHOPAEDICS AND RELATED RESEARCH
CLIN PEDIATR	CLINICAL PEDIATRICS
CLIN PHARMACOKINET	CLINICAL PHARMACOKINETICS
CLIN PHARMACOL THER	CLINICAL PHARMACOLOGY AND THERAPEUTICS
CLIN RADIOL	CLINICAL RADIOLOGY
CLIN RES	CLINICAL RESEARCH
CLIN SCI MOL MED	CLINICAL SCIENCE AND MOLECULAR MEDICINE
CLIN SOC WORK J	CLINICAL SOCIAL WORK JOURNAL
CLIN TER	CLINICA TERAPEUTICA
CLIN THER	CLINICAL THERAPEUTICS
CLIN TOXICOL	CLINICAL TOXICOLOGY
CLIN TRIALS J	CLINICAL TRIALS JOURNAL
CLINICIAN	CLINICIAN
CO-EXISTENCE	CO-EXISTENCE
COEUR MED INTERNE	COEUR ET MEDECINE INTERNE
COEUR-REV CARD MED-C	COEUR, REVUE DE CARDIOLOGIE MEDICO-CHIRURGICALE

ABBREVIATION	FULL TITLE
COGNITION	COGNITION
COGNITIVE PSYCHOL	COGNITIVE PSYCHOLOGY
COKE CHEM USSR*	COKE AND CHEMISTRY, USSR
COLD SPRING HARB SYM	COLD SPRING HARBOR SYMPOSIA ON QUANTITATIVE BIOLOGY
COLL ENGL	COLLEGE ENGLISH
COLL RES LIBR	COLLEGE & RESEARCH LIBRARIES
COLL UNIV	COLLEGE AND UNIVERSITY
COLL UNIV J	COLLEGE & UNIVERSITY JOURNAL
COLLECT CZECH CHEM C	COLLECTION OF CZECHOSLOVAK CHEMICAL COMMUNICATIONS
COLLOID J USSR*	COLLOID JOURNAL OF THE USSR
COLLOID POLYM SCI	COLLOID AND POLYMER SCIENCE
COLLOID SCI-SPR	COLLOID SCIENCE-SPECIALIST PERIODICAL REPORTS
COLUMBIA FORUM	COLUMBIA FORUM
COLUMBIA HUM R LAW R	COLUMBIA HUMAN RIGHTS LAW REVIEW
COLUMBIA J LAW SOC P	COLUMBIA JOURNAL OF LAW AND SOCIAL PROBLEMS
COLUMBIA J TRANS LAW	COLUMBIA JOURNAL OF TRANSNATIONAL LAW
COLUMBIA J WORLD BUS	COLUMBIA JOURNAL OF WORLD BUSINESS
COLUMBIA JOURNAL REV	COLUMBIA JOURNALISM REVIEW
COLUMBIA LAW REV	COLUMBIA LAW REVIEW
COMBUST EXPLO SHOCK*	COMBUSTION, EXPLOSION, AND SHOCK WAVES
COMBUST FLAME	COMBUSTION AND FLAME
COMBUST SCI TECHNOL	COMBUSTION SCIENCE AND TECHNOLOGY
COMBUSTION	COMBUSTION
COMMENT CONTEMP PSY	COMMENTS ON CONTEMPORARY PSYCHIATRY
COMMENT MATH HELV	COMMENTARII MATHEMATICI HELVETICI
COMMENT PHYS-MATH	COMMENTATIONES PHYSICO-MATHEMATICAE
COMMENTARY	COMMENTARY
COMMON MKT LAW REV	COMMON MARKET LAW REVIEW
COMMONW FOREST REV	COMMONWEALTH FORESTRY REVIEW
COMMONW FOUND-OCC PA	COMMONWEALTH FOUNDATION-OCCASIONAL PAPER
COMMONWEAL	COMMONWEAL
COMMUN ACM	COMMUNICATIONS OF THE ACM
COMMUN ALGEBRA	COMMUNICATIONS IN ALGEBRA
COMMUN BROADCAST	COMMUNICATION AND BROADCASTING
COMMUN COGNITION	COMMUNICATION AND COGNITION
COMMUN MATH PHYS	COMMUNICATIONS IN MATHEMATICAL PHYSICS
COMMUN MONOGR	COMMUNICATION MONOGRAPHS
COMMUN PHYS	COMMUNICATIONS ON PHYSICS
COMMUN PSYCHOPHARMAC	COMMUNICATIONS IN PSYCHOPHARMACOLOGY
COMMUN PUR APPL MATH	COMMUNICATIONS ON PURE AND APPLIED MATHEMATICS
COMMUN RES	COMMUNICATION RESEARCH
COMMUN SOIL SCI PLAN	COMMUNICATIONS IN SOIL SCIENCE AND PLANT ANALYSIS
COMMUN STAT	COMMUNICATIONS IN STATISTICS
COMMUN STAT SIMULAT	COMMUNICATIONS IN STATISTICS-SIMULATION AND COMPUTATION
COMMUN STAT THEORY	COMMUNICATIONS IN STATISTICS-THEORY AND METHODS
COMMUNITY DENT ORAL	COMMUNITY DENTISTRY AND ORAL EPIDEMIOLOGY

J CONTEMP HIST	JOURNAL OF CONTEMPORARY HISTORY
J CONTEMP PSYCHOTHER	JOURNAL OF CONTEMPORARY PSYCHOTHERAPY
J CONTIN EDUC NURS	JOURNAL OF CONTINUING EDUCATION IN NURSING
J COORD CHEM	JOURNAL OF COORDINATION CHEMISTRY
J CORP TAX	JOURNAL OF CORPORATE TAXATION
J COUNS PSYCHOL	JOURNAL OF COUNSELING PSYCHOLOGY
J CREATIVE BEHAV	JOURNAL OF CREATIVE BEHAVIOR
J CRIM JUST	JOURNAL OF CRIMINAL JUSTICE
J CRIM LAW CRIM	JOURNAL OF CRIMINAL LAW & CRIMINOLOGY
J CROSS CULT PSYCHOL	JOURNAL OF CROSS CULTURAL PSYCHOLOGY
J CRYST GROWTH	JOURNAL OF CRYSTAL GROWTH
J CRYST MOL STRUCT	JOURNAL OF CRYSTAL AND MOLECULAR STRUCTURE
J CURR SOC ISSUES	JOURNAL OF CURRENT SOCIAL ISSUES
J CURRICULUM STUD	JOURNAL OF CURRICULUM STUDIES

ABBREVIATION	FULL TITLE
J CUTAN PATHOL	JOURNAL OF CUTANEOUS PATHOLOGY
J CYBERNETICS	JOURNAL OF CYBERNETICS
J CYCLIC NUCL RES	JOURNAL OF CYCLIC NUCLEOTIDE RESEARCH
J DAIRY RES	JOURNAL OF DAIRY RESEARCH
J DAIRY SCI	JOURNAL OF DAIRY SCIENCE
J DENT	JOURNAL OF DENTISTRY
J DENT CHILD	JOURNAL OF DENTISTRY FOR CHILDREN
J DENT EDUC	JOURNAL OF DENTAL EDUCATION
J DENT RES	JOURNAL OF DENTAL RESEARCH
J DEV AREAS	JOURNAL OF DEVELOPING AREAS
J DEV ECON	JOURNAL OF DEVELOPMENT ECONOMICS
J DEV STUD	JOURNAL OF DEVELOPMENT STUDIES
J DIALYSIS	JOURNAL OF DIALYSIS
J DIFFER EQUATIONS	JOURNAL OF DIFFERENTIAL EQUATIONS
J DOC	JOURNAL OF DOCUMENTATION
J DRUG EDUC	JOURNAL OF DRUG EDUCATION
J DRUG ISSUES	JOURNAL OF DRUG ISSUES
J ECOL	JOURNAL OF ECOLOGY
J ECON BUS	JOURNAL OF ECONOMICS AND BUSINESS
J ECON EDUC	JOURNAL OF ECONOMIC EDUCATION
J ECON ENTOMOL	JOURNAL OF ECONOMIC ENTOMOLOGY
J ECON HIST	JOURNAL OF ECONOMIC HISTORY
J ECON ISSUES	JOURNAL OF ECONOMIC ISSUES
J ECON LIT	JOURNAL OF ECONOMIC LITERATURE
J ECON STUD	JOURNAL OF ECONOMIC STUDIES
J ECON THEORY	JOURNAL OF ECONOMIC THEORY
J EDUC ADMIN	JOURNAL OF EDUCATIONAL ADMINISTRATION
J EDUC LIBR	JOURNAL OF EDUCATION FOR LIBRARIANSHIP
J EDUC MEAS	JOURNAL OF EDUCATIONAL MEASUREMENT
J EDUC PSYCHOL	JOURNAL OF EDUCATIONAL PSYCHOLOGY
J EDUC RES	JOURNAL OF EDUCATIONAL RESEARCH
J EDUC SOC WORK	JOURNAL OF EDUCATION FOR SOCIAL WORK
J EDUC THOUGHT	JOURNAL OF EDUCATIONAL THOUGHT
J ELASTICITY	JOURNAL OF ELASTICITY
J ELECTROANAL CH INF	JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY
J ELECTROCARDIOL	JOURNAL OF ELECTROCARDIOLOGY
J ELECTROCHEM SOC	JOURNAL OF THE ELECTROCHEMICAL SOCIETY
J ELECTRON MATER	JOURNAL OF ELECTRONIC MATERIALS
J ELECTRON MICROSC	JOURNAL OF ELECTRON MICROSCOPY
J ELECTRON SPECTROSC	JOURNAL OF ELECTRON SPECTROSCOPY AND RELATED PHENOMENA
J EMBRYOL EXP MORPH	JOURNAL OF EMBRYOLOGY AND EXPERIMENTAL MORPHOLOGY
J EMPLOYMENT COUNS	JOURNAL OF EMPLOYMENT COUNSELING
J ENDOCRINOL	JOURNAL OF ENDOCRINOLOGY
J ENERGY DEV	JOURNAL OF ENERGY AND DEVELOPMENT
J ENG IND-T ASME B	JOURNAL OF ENGINEERING FOR INDUSTRY (TRANSACTIONS OF THE ASME SERIES B)
J ENG MATER-T ASME H	JOURNAL OF ENGINEERING MATERIALS AND TECHNOLOGY (TRANSACTIONS OF THE ASME SERIES H)
J ENG MATH	JOURNAL OF ENGINEERING MATHEMATICS
J ENG MECH ASCE	JOURNAL OF THE ENGINEERING MECHANICS DIVISION-ASCE
J ENG POWER-T ASME A	JOURNAL OF ENGINEERING FOR POWER (TRANSACTIONS OF THE ASME SERIES A)
J ENTOMOL SER A	JOURNAL OF ENTOMOLOGY SERIES A. GENERAL ENTOMOLOGY
J ENTOMOL SER B	JOURNAL OF ENTOMOLOGY SERIES B. TAXONOMY
J ENVIRON ECON MANAG	JOURNAL OF ENVIRONMENTAL ECONOMICS AND MANAGEMENT
J ENVIRON EDUC	JOURNAL OF ENVIRONMENTAL EDUCATION
J ENVIRON ENG D ASCE	JOURNAL OF THE ENVIRONMENTAL ENGINEERING DIVISION-ASCE
J ENVIRON MANAGE	JOURNAL OF ENVIRONMENTAL MANAGEMENT
J ENVIRON QUAL	JOURNAL OF ENVIRONMENTAL QUALITY
J ENVIRON SCI	JOURNAL OF ENVIRONMENTAL SCIENCES
J ENVIRON SCI HEAL A	JOURNAL OF ENVIRONMENTAL SCIENCE AND HEALTH PART A-ENVIRONMENTAL SCIENCE AND ENGINEERING
J ENVIRON SCI HEAL B	JOURNAL OF ENVIRONMENTAL SCIENCE AND HEALTH PART B-PESTICIDES FOOD CONTAMINANTS AND AGRICULTURAL WASTES
J ENVIRON SYST	JOURNAL OF ENVIRONMENTAL SYSTEMS
J EQUINE MED SURG	JOURNAL OF EQUINE MEDICINE AND SURGERY
J EUR STUD	JOURNAL OF EUROPEAN STUDIES
J EXP ANAL BEHAV	JOURNAL OF THE EXPERIMENTAL ANALYSIS OF BEHAVIOR
J EXP BIOL	JOURNAL OF EXPERIMENTAL BIOLOGY
J EXP BOT	JOURNAL OF EXPERIMENTAL BOTANY
J EXP CHILD PSYCHOL	JOURNAL OF EXPERIMENTAL CHILD PSYCHOLOGY
J EXP EDUC	JOURNAL OF EXPERIMENTAL EDUCATION
J EXP MAR BIOL ECOL	JOURNAL OF EXPERIMENTAL MARINE BIOLOGY AND ECOLOGY
J EXP MED	JOURNAL OF EXPERIMENTAL MEDICINE
J EXP PSYCHOL	JOURNAL OF EXPERIMENTAL PSYCHOLOGY
J EXP PSYCHOL ANIM B	JOURNAL OF EXPERIMENTAL PSYCHOLOGY-ANIMAL BEHAVIOR PROCESSES
J EXP PSYCHOL GEN	JOURNAL OF EXPERIMENTAL PSYCHOLOGY-GENERAL
J EXP PSYCHOL LEARN	JOURNAL OF EXPERIMENTAL PSYCHOLOGY-HUMAN LEARNING AND MEMORY
J EXP PSYCHOL PERCEP	JOURNAL OF EXPERIMENTAL PSYCHOLOGY-HUMAN PERCEPTION AND PERFORMANCE
J EXP SOC PSYCHOL	JOURNAL OF EXPERIMENTAL SOCIAL PSYCHOLOGY
J EXP ZOOL	JOURNAL OF EXPERIMENTAL ZOOLOGY
J EXTENSION	JOURNAL OF EXTENSION
J EXTRA-CORP TECHNOL	JOURNAL OF EXTRA-CORPOREAL TECHNOLOGY
J FAM COUNS	JOURNAL OF FAMILY COUNSELING
J FAM LAW	JOURNAL OF FAMILY LAW
J FAM PRACTICE	JOURNAL OF FAMILY PRACTICE
J FAM WELFARE	JOURNAL OF FAMILY WELFARE
J FERMENT TECHNOL	JOURNAL OF FERMENTATION TECHNOLOGY
J FINANC	JOURNAL OF FINANCE
J FINANC QUANT ANAL	JOURNAL OF FINANCIAL AND QUANTITATIVE ANALYSIS
J FISH BIOL	JOURNAL OF FISH BIOLOGY
J FISH RES BOARD CAN	JOURNAL OF THE FISHERIES RESEARCH BOARD OF CANADA
J FLA MED ASSOC	JOURNAL OF THE FLORIDA MEDICAL ASSOCIATION
J FLUID ENG	JOURNAL OF FLUIDS ENGINEERING (TRANSACTIONS OF THE ASME SERIES I)
J FLUID MECH	JOURNAL OF FLUID MECHANICS
J FLUORINE CHEM	JOURNAL OF FLUORINE CHEMISTRY
J FOOD PROTECT	JOURNAL OF FOOD PROTECTION
J FOOD SCI	JOURNAL OF FOOD SCIENCE
J FORENSIC SCI SOC	JOURNAL OF THE FORENSIC SCIENCE SOCIETY
J FOREST	JOURNAL OF FORESTRY
J FR BIOPHYS MED NUC	JOURNAL FRANCAIS DE BIOPHYSIQUE AND MEDECINE NUCLEAIRE
J FR OTORHINOLARYNG	JOURNAL FRANCAIS D'OTO-RHINO-LARYNGOLOGIE
J FRANKLIN I	JOURNAL OF THE FRANKLIN INSTITUTE
J FUNCT ANAL	JOURNAL OF FUNCTIONAL ANALYSIS
J GEN APPL MICROBIOL	JOURNAL OF GENERAL AND APPLIED MICROBIOLOGY
J GEN EDUC	JOURNAL OF GENERAL EDUCATION
J GEN MANAGE	JOURNAL OF GENERAL MANAGEMENT

ABBREVIATION	FULL TITLE
J GEN MICROBIOL	JOURNAL OF GENERAL MICROBIOLOGY
J GEN PHYSIOL	JOURNAL OF GENERAL PHYSIOLOGY
J GEN PSYCHOL	JOURNAL OF GENERAL PSYCHOLOGY
J GEN VIROL	JOURNAL OF GENERAL VIROLOGY
J GENET	JOURNAL OF GENETICS
J GENET HUM	JOURNAL DE GENETIQUE HUMAINE
J GENET PSYCHOL	JOURNAL OF GENETIC PSYCHOLOGY
J GEOCHEM EXPLOR	JOURNAL OF GEOCHEMICAL EXPLORATION
J GEOGR	JOURNAL OF GEOGRAPHY
J GEOL	JOURNAL OF GEOLOGY
J GEOL SOC INDIA	JOURNAL OF THE GEOLOGICAL SOCIETY OF INDIA
J GEOMAGN GEOELECTR	JOURNAL OF GEOMAGNETISM AND GEOELECTRICITY
J GEOPHYS RES	JOURNAL OF GEOPHYSICAL RESEARCH
J GEOPHYS RES-OCEAN	JOURNAL OF GEOPHYSICAL RESEARCH-OCEANS AND ATMOSPHERES
J GEOPHYS RES-SPACE	JOURNAL OF GEOPHYSICAL RESEARCH-SPACE PHYSICS
J GEOPHYS-Z GEOPHYS	JOURNAL OF GEOPHYSICS-ZEITSCHRIFT FUR GEOPHYSIK
J GERIATR PSYCHIAT	JOURNAL OF GERIATRIC PSYCHIATRY
J GERONTOL	JOURNAL OF GERONTOLOGY
J GYNECOL OBST BIO R	JOURNAL DE GYNECOLOGIE OBSTETRIQUE ET BIOLOGIE DE LA REPRODUCTION
J HAZARD MATER	JOURNAL OF HAZARDOUS MATERIALS
J HEALTH POLIT POLIC	JOURNAL OF HEALTH POLITICS POLICY AND LAW
J HEALTH SOC BEHAV	JOURNAL OF HEALTH AND SOCIAL BEHAVIOR
J HEAT TRANS-TASME C	JOURNAL OF HEAT TRANSFER (TRANSACTIONS OF THE ASME SERIES C)
J HELMINTHOL	JOURNAL OF HELMINTHOLOGY
J HERED	JOURNAL OF HEREDITY
J HETEROCYCLIC CHEM	JOURNAL OF HETEROCYCLIC CHEMISTRY
J HIGH EDUC	JOURNAL OF HIGHER EDUCATION
J HIRNFORSCH	JOURNAL FUR HIRNFORSCHUNG
J HIST BEHAV SCI	JOURNAL OF THE HISTORY OF THE BEHAVIORAL SCIENCES
J HIST GEOGR	JOURNAL OF HISTORICAL GEOGRAPHY
J HIST IDEAS	JOURNAL OF THE HISTORY OF IDEAS
J HISTOCHEM CYTOCHEM	JOURNAL OF HISTOCHEMISTRY AND CYTOCHEMISTRY
J HOMOSEXUAL	JOURNAL OF HOMOSEXUALITY
J HORTIC SCI	JOURNAL OF HORTICULTURAL SCIENCE
J HOUSING	JOURNAL OF HOUSING
J HUM EVOL	JOURNAL OF HUMAN EVOLUTION
J HUM NUTR	JOURNAL OF HUMAN NUTRITION
J HUM RELAT	JOURNAL OF HUMAN RELATIONS
J HUM RESOUR	JOURNAL OF HUMAN RESOURCES
J HUM STRESS	JOURNAL OF HUMAN STRESS
J HUMANIST PSYCHOL	JOURNAL OF HUMANISTIC PSYCHOLOGY
J HYDRAUL DIV ASCE	JOURNAL OF THE HYDRAULICS DIVISION-ASCE
J HYDROL	JOURNAL OF HYDROLOGY
J HYDRONAUT	JOURNAL OF HYDRONAUTICS
J HYG EPID MICROB IM	JOURNAL OF HYGIENE EPIDEMIOLOGY MICROBIOLOGY AND IMMUNOLOGY
J HYG-CAMBRIDGE	JOURNAL OF HYGIENE
J I BREWING	JOURNAL OF THE INSTITUTE OF BREWING
J I FUEL	JOURNAL OF THE INSTITUTE OF FUEL
J I MATH APPL	JOURNAL OF THE INSTITUTE OF MATHEMATICS AND ITS APPLICATIONS
J I MET	JOURNAL OF THE INSTITUTE OF METALS
J I NUCL ENG	JOURNAL OF THE INSTITUTION OF NUCLEAR ENGINEERS
J I PETROL	JOURNAL OF THE INSTITUTE OF PETROLEUM
J I WOOD SCI	JOURNAL OF THE INSTITUTE OF WOOD SCIENCE
J IMMUNOGENET	JOURNAL OF IMMUNOGENETICS
J IMMUNOL	JOURNAL OF IMMUNOLOGY
J IMMUNOL METHODS	JOURNAL OF IMMUNOLOGICAL METHODS
J IND AERODYNAM	JOURNAL OF INDUSTRIAL AERODYNAMICS
J IND ECON	JOURNAL OF INDUSTRIAL ECONOMICS
J INDIAN CHEM SOC	JOURNAL OF THE INDIAN CHEMICAL SOCIETY
J INDIAN I SCI	JOURNAL OF THE INDIAN INSTITUTE OF SCIENCE
J INDIAN I SCI A-ENG	JOURNAL OF THE INDIAN INSTITUTE OF SCIENCE SECTION A-ENGINEERING AND TECHNOLOGY
J INDIAN I SCI B-PHY	JOURNAL OF THE INDIAN INSTITUTE OF SCIENCE SECTION B-PHYSICAL AND CHEMICAL SCIENCES
J INDIAN I SCI C-BIO	JOURNAL OF THE INDIAN INSTITUTE OF SCIENCE SECTION C-BIOLOGICAL SCIENCES
J INDIV PSYCHOL	JOURNAL OF INDIVIDUAL PSYCHOLOGY
J INFECT DIS	JOURNAL OF INFECTIOUS DISEASES
J INORG NUCL CHEM	JOURNAL OF INORGANIC AND NUCLEAR CHEMISTRY
J INSECT PHYSIOL	JOURNAL OF INSECT PHYSIOLOGY
J INT AFF	JOURNAL OF INTERNATIONAL AFFAIRS
J INT ASS MATH GEOL	JOURNAL OF THE INTERNATIONAL ASSOCIATION FOR MATHEMATICAL GEOLOGY
J INT BUS STUD	JOURNAL OF INTERNATIONAL BUSINESS STUDIES
J INT ECON	JOURNAL OF INTERNATIONAL ECONOMICS
J INT LAW ECON	JOURNAL OF INTERNATIONAL LAW AND ECONOMICS
J INT MED RES	JOURNAL OF INTERNATIONAL MEDICAL RESEARCH
J INTER-AM STUD WLD	JOURNAL OF INTER-AMERICAN STUDIES AND WORLD AFFAIRS
J INTERDISCIPL CYCLE	JOURNAL OF INTERDISCIPLINARY CYCLE RESEARCH
J INTERDISCIPL HIST	JOURNAL OF INTERDISCIPLINARY HISTORY
J INVERTEBR PATHOL	JOURNAL OF INVERTEBRATE PATHOLOGY
J INVEST DERMATOL	JOURNAL OF INVESTIGATIVE DERMATOLOGY
J IOWA MED SOC	JOURNAL OF THE IOWA MEDICAL SOCIETY
J IRISH COLL PHYS S	JOURNAL OF THE IRISH COLLEGES OF PHYSICIANS AND SURGEONS
J IRISH MED ASSOC	JOURNAL OF THE IRISH MEDICAL ASSOCIATION
J IRON STEEL I	JOURNAL OF THE IRON AND STEEL INSTITUTE
J IRRIG DRAIN D ASCE	JOURNAL OF THE IRRIGATION AND DRAINAGE DIVISION-ASCE
J JPN I MET	JOURNAL OF THE JAPAN INSTITUTE OF METALS
J JPN SOC HORTIC SCI	JOURNAL OF THE JAPANESE SOCIETY FOR HORTICULTURAL SCIENCE
J JPN SOC LUBR ENG	JOURNAL OF JAPAN SOCIETY OF LUBRICATION ENGINEERS
J KANSAS MED SOC	JOURNAL OF THE KANSAS MEDICAL SOCIETY
J KENTUCKY MED ASSOC	JOURNAL OF THE KENTUCKY MEDICAL ASSOCIATION
J KUWAIT MED ASSOC	JOURNAL OF THE KUWAIT MEDICAL ASSOCIATION
J LAB CLIN MED	JOURNAL OF LABORATORY AND CLINICAL MEDICINE
J LABELLED COMPD RAD	JOURNAL OF LABELLED COMPOUNDS & RADIOPHARMACEUTICALS
J LARYNGOL OTOL	JOURNAL OF LARYNGOLOGY AND OTOLOGY
J LAW ECON	JOURNAL OF LAW AND ECONOMICS
J LAW EDUC	JOURNAL OF LAW AND EDUCATION
J LEARN DISABIL	JOURNAL OF LEARNING DISABILITIES
J LEGAL EDUC	JOURNAL OF LEGAL EDUCATION
J LEGAL STUD	JOURNAL OF LEGAL STUDIES
J LEISURE RES	JOURNAL OF LEISURE RESEARCH
J LESS-COMMON MET	JOURNAL OF THE LESS-COMMON METALS
J LIBR	JOURNAL OF LIBRARIANSHIP
J LIBR AUTOMAT	JOURNAL OF LIBRARY AUTOMATION

ABBREVIATION	FULL TITLE
J LIBR HISTORY	JOURNAL OF LIBRARY HISTORY PHILOSOPHY AND COMPARATIVE LIBRARIANSHIP
J LINGUIST	JOURNAL OF LINGUISTICS
J LIPID RES	JOURNAL OF LIPID RESEARCH
J LOND MATH SOC	JOURNAL OF THE LONDON MATHEMATICAL SOCIETY-SECOND SERIES
J LOUISIANA ST MED S	JOURNAL OF THE LOUISIANA STATE MEDICAL SOCIETY
J LOW TEMP PHYS	JOURNAL OF LOW TEMPERATURE PHYSICS
J LUBRIC TEC-TASME F	JOURNAL OF LUBRICATION TECHNOLOGY (TRANSACTIONS OF THE ASME SERIES F)
J LUMIN	JOURNAL OF LUMINESCENCE
J MACROMOL SCI CHEM	JOURNAL OF MACROMOLECULAR SCIENCE. CHEMISTRY
J MACROMOL SCI PHYS	JOURNAL OF MACROMOLECULAR SCIENCE. PHYSICS
J MACROMOL SCI R M C	JOURNAL OF MACROMOLECULAR SCIENCE-REVIEWS IN MACROMOLECULAR CHEMISTRY
J MAGN MAGN MATER	JOURNAL OF MAGNETISM AND MAGNETIC MATERIALS
J MAGN RESON	JOURNAL OF MAGNETIC RESONANCE
J MAINE MED ASSOC	JOURNAL OF THE MAINE MEDICAL ASSOCIATION
J MAMMAL	JOURNAL OF MAMMALOGY
J MANAGE STUD	JOURNAL OF MANAGEMENT STUDIES
J MAR BIOL ASSOC UK	JOURNAL OF THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM
J MAR RES	JOURNAL OF MARINE RESEARCH
J MARIT LAW COMMER	JOURNAL OF MARITIME LAW AND COMMERCE
J MARK	JOURNAL OF MARKETING
J MARK RES	JOURNAL OF MARKETING RESEARCH
J MARK RES SOC	JOURNAL OF THE MARKET RESEARCH SOCIETY-LONDON
J MARRIAGE FAM	JOURNAL OF MARRIAGE AND THE FAMILY
J MATER SCI	JOURNAL OF MATERIALS SCIENCE
J MATH ANAL APPL	JOURNAL OF MATHEMATICAL ANALYSIS AND APPLICATIONS
J MATH BIOL	JOURNAL OF MATHEMATICAL BIOLOGY
J MATH PHYS	JOURNAL OF MATHEMATICAL PHYSICS
J MATH PSYCHOL	JOURNAL OF MATHEMATICAL PSYCHOLOGY
J MATH PURE APPL	JOURNAL DE MATHEMATIQUES PURES ET APPLIQUEES
J MATH SOC JPN	JOURNAL OF THE MATHEMATICAL SOCIETY OF JAPAN
J MATH SOCIOL	JOURNAL OF MATHEMATICAL SOCIOLOGY
J MAXILLOFAC SURG	JOURNAL OF MAXILLO-FACIAL SURGERY
J MECANIQUE	JOURNAL DE MECANIQUE
J MECH ENG SCI	JOURNAL OF MECHANICAL ENGINEERING SCIENCE
J MECH PHYS SOLIDS	JOURNAL OF THE MECHANICS AND PHYSICS OF SOLIDS
J MED ASSOC THAILAND	JOURNAL OF THE MEDICAL ASSOCIATION OF THAILAND
J MED CHEM	JOURNAL OF MEDICINAL CHEMISTRY
J MED CLIN EXP THEOR	JOURNAL OF MEDICINE CLINICAL, EXPERIMENTAL AND THEORETICAL
J MED EDUC	JOURNAL OF MEDICAL EDUCATION
J MED ENG TECHNOL	JOURNAL OF MEDICAL ENGINEERING AND TECHNOLOGY
J MED ENTOMOL	JOURNAL OF MEDICAL ENTOMOLOGY
J MED ETHICS	JOURNAL OF MEDICAL ETHICS
J MED GENET	JOURNAL OF MEDICAL GENETICS
J MED MICROBIOL	JOURNAL OF MEDICAL MICROBIOLOGY
J MED PRIMATOL	JOURNAL OF MEDICAL PRIMATOLOGY
J MED STRASBOURG	JOURNAL DE MEDICINE DE STRASBOURG
J MED VIROL	JOURNAL OF MEDICAL VIROLOGY
J MEMBRANE BIOL	JOURNAL OF MEMBRANE BIOLOGY
J MENT DEFIC RES	JOURNAL OF MENTAL DEFICIENCY RESEARCH
J MENT SCI	JOURNAL OF MENTAL SCIENCE
J MET	JOURNAL OF METALS
J MICROGRAPHICS	JOURNAL OF MICROGRAPHICS
J MICROSC BIOL CELL	JOURNAL DE MICROSCOPIE ET DE BIOLOGIE CELLULAIRE
J MICROSC SPECT ELEC	JOURNAL DE MICROSCOPIE ET DE SPECTROSCOPIE ELECTRONIQUES
J MICROSC-OXFORD	JOURNAL OF MICROSCOPY-OXFORD
J MICROSC-PARIS	JOURNAL DE MICROSCOPIE-PARIS
J MILK FOOD TECHNOL	JOURNAL OF MILK AND FOOD TECHNOLOGY
J MISS STATE MED ASS	JOURNAL OF THE MISSISSIPPI STATE MEDICAL ASSOCIATION
J MOD AFR STUD	JOURNAL OF MODERN AFRICAN STUDIES
J MOD HIST	JOURNAL OF MODERN HISTORY
J MOL BIOL	JOURNAL OF MOLECULAR BIOLOGY
J MOL CATAL	JOURNAL OF MOLECULAR CATALYSIS
J MOL CELL CARDIOL	JOURNAL OF MOLECULAR AND CELLULAR CARDIOLOGY
J MOL EVOL	JOURNAL OF MOLECULAR EVOLUTION
J MOL MED	JOURNAL OF MOLECULAR MEDICINE
J MOL SPECTROSC	JOURNAL OF MOLECULAR SPECTROSCOPY
J MOL STRUCT	JOURNAL OF MOLECULAR STRUCTURE
J MORAL EDUC	JOURNAL OF MORAL EDUCATION
J MORPHOL	JOURNAL OF MORPHOLOGY
J MOTOR BEHAV	JOURNAL OF MOTOR BEHAVIOR
J MULTIVARIATE ANAL	JOURNAL OF MULTIVARIATE ANALYSIS
J MUSIC THER	JOURNAL OF MUSIC THERAPY
J NAT HIST	JOURNAL OF NATURAL HISTORY
J NATL CANCER I	JOURNAL OF THE NATIONAL CANCER INSTITUTE
J NAVIGATION	JOURNAL OF NAVIGATION
J NEAR EASTERN STUD	JOURNAL OF NEAR EASTERN STUDIES
J NEGRO EDUC	JOURNAL OF NEGRO EDUCATION
J NEGRO HIST	JOURNAL OF NEGRO HISTORY
J NEMATOL	JOURNAL OF NEMATOLOGY
J NERV MENT DIS	JOURNAL OF NERVOUS AND MENTAL DISEASE
J NEURAL TRANSM	JOURNAL OF NEURAL TRANSMISSION
J NEUROBIOL	JOURNAL OF NEUROBIOLOGY
J NEUROCHEM	JOURNAL OF NEUROCHEMISTRY
J NEUROCYTOL	JOURNAL OF NEUROCYTOLOGY
J NEUROL	JOURNAL OF NEUROLOGY/ZEITSCHRIFT FUR NEUROLOGIE
J NEUROL NEUROSUR PS	JOURNAL OF NEUROLOGY, NEUROSURGERY AND PSYCHIATRY
J NEUROL SCI	JOURNAL OF THE NEUROLOGICAL SCIENCES
J NEUROPATH EXP NEUR	JOURNAL OF NEUROPATHOLOGY AND EXPERIMENTAL NEUROLOGY

J ROY STAT SOC B MET	JOURNAL OF THE ROYAL STATISTICAL SOCIETY. SERIES B. METHODOLOGICAL
J ROY STAT SOC C APP	JOURNAL OF THE ROYAL STATISTICAL SOCIETY. SERIES C. APPLIED STATISTICS
J S AFR CHEM I	JOURNAL OF THE SOUTH AFRICAN CHEMICAL INSTITUTE
J S AFR I MIN METALL	JOURNAL OF THE SOUTH AFRICAN INSTITUTE OF MINING AND METALLURGY
J S AFR STUD	JOURNAL OF SOUTHERN AFRICAN STUDIES
J S C MED ASSOC	JOURNAL OF THE SOUTH CAROLINA MEDICAL ASSOCIATION
J SAFETY RES	JOURNAL OF SAFETY RESEARCH
J SCHOOL HEALTH	JOURNAL OF SCHOOL HEALTH
J SCHOOL PSYCHOL	JOURNAL OF SCHOOL PSYCHOLOGY
J SCI FOOD AGR	JOURNAL OF THE SCIENCE OF FOOD AND AGRICULTURE
J SCI IND RES INDIA	JOURNAL OF SCIENTIFIC AND INDUSTRIAL RESEARCH
J SCI INSTRUM	JOURNAL OF SCIENTIFIC INSTRUMENTS
J SCI STUD RELIG	JOURNAL FOR THE SCIENTIFIC STUDY OF RELIGION
J SCI TECHNOL	JOURNAL OF SCIENCE & TECHNOLOGY
J SEDIMENT PETROL	JOURNAL OF SEDIMENTARY PETROLOGY
J SEX MARRIAGE THER	JOURNAL OF SEX AND MARITAL THERAPY
J SEX RES	JOURNAL OF SEX RESEARCH
J SHIP RES	JOURNAL OF SHIP RESEARCH
J SMALL ANIM PRACT	JOURNAL OF SMALL ANIMAL PRACTICE
J SOC AMERICANISTES	JOURNAL DE LA SOCIETE DES AMERICANISTES
J SOC ARCHIT HIST	JOURNAL OF THE SOCIETY OF ARCHITECTURAL HISTORIANS
J SOC COSMET CHEM	JOURNAL OF THE SOCIETY OF COSMETIC CHEMISTS
J SOC DYERS COLOUR	JOURNAL OF THE SOCIETY OF DYERS AND COLOURISTS
J SOC HIST	JOURNAL OF SOCIAL HISTORY
J SOC ISSUES	JOURNAL OF SOCIAL ISSUES
J SOC OCCUP MED	JOURNAL OF THE SOCIETY OF OCCUPATIONAL MEDICINE
J SOC POLICY	JOURNAL OF SOCIAL POLICY
J SOC PSYCHOL	JOURNAL OF SOCIAL PSYCHOLOGY
J SOIL SCI	JOURNAL OF SOIL SCIENCE
J SOIL WATER CONSERV	JOURNAL OF SOIL AND WATER CONSERVATION
J SOLID STATE CHEM	JOURNAL OF SOLID STATE CHEMISTRY
J SOLUTION CHEM	JOURNAL OF SOLUTION CHEMISTRY
J SOUND VIB	JOURNAL OF SOUND AND VIBRATION
J SOUTHE ASIAN STUD	JOURNAL OF SOUTHEAST ASIAN STUDIES
J SOUTHERN HIST	JOURNAL OF SOUTHERN HISTORY
J SPACECRAFT ROCKETS	JOURNAL OF SPACECRAFT AND ROCKETS
J SPEC EDUC	JOURNAL OF SPECIAL EDUCATION
J SPEC EDUC MENT RET	JOURNAL FOR SPECIAL EDUCATORS OF THE MENTALLY RETARDED
J SPEECH HEAR DISORD	JOURNAL OF SPEECH AND HEARING DISORDERS
J SPEECH HEAR RES	JOURNAL OF SPEECH AND HEARING RESEARCH
J SPORT HIST	JOURNAL OF SPORT HISTORY
J SPORT MED PHYS FIT	JOURNAL OF SPORTS MEDICINE AND PHYSICAL FITNESS
J STAT PHYS	JOURNAL OF STATISTICAL PHYSICS
J STEROID BIOCHEM	JOURNAL OF STEROID BIOCHEMISTRY
J STORED PROD RES	JOURNAL OF STORED PRODUCTS RESEARCH
J STRAIN ANAL ENG	JOURNAL OF STRAIN ANALYSIS FOR ENGINEERING DESIGN
J STRUCT CHEM*	JOURNAL OF STRUCTURAL CHEMISTRY
J STRUCT DIV ASCE	JOURNAL OF THE STRUCTURAL DIVISION-ASCE
J STRUCT LEARN	JOURNAL OF STRUCTURAL LEARNING
J STRUCT MECH	JOURNAL OF STRUCTURAL MECHANICS
J STUD ALCOHOL	JOURNAL OF STUDIES ON ALCOHOL
J SUBMICROSC CYTOL	JOURNAL OF SUBMICROSCOPIC CYTOLOGY
J SUPRAMOL STRUCT	JOURNAL OF SUPRAMOLECULAR STRUCTURE
J SURG RES	JOURNAL OF SURGICAL RESEARCH
J SURV MAPP DIV-ASCE	JOURNAL OF THE SURVEYING AND MAPPING DIVISION-ASCE
J SYMBOLIC LOGIC	JOURNAL OF SYMBOLIC LOGIC
J SYN ORG CHEM JPN	JOURNAL OF SYNTHETIC ORGANIC CHEMISTRY, JAPAN
J SYST MANAGE	JOURNAL OF SYSTEMS MANAGEMENT
J TAX	JOURNAL OF TAXATION
J TEACH EDUC	JOURNAL OF TEACHER EDUCATION
J TECH WRIT COMMUN	JOURNAL OF TECHNICAL WRITING AND COMMUNICATION
J TENNESSEE MED ASS	JOURNAL OF THE TENNESSEE MEDICAL ASSOCIATION
J TEST EVAL	JOURNAL OF TESTING AND EVALUATION
J TEXT I	JOURNAL OF THE TEXTILE INSTITUTE
J THEOR BIOL	JOURNAL OF THEORETICAL BIOLOGY
J THEOR SOC BEHAV	JOURNAL FOR THE THEORY OF SOCIAL BEHAVIOUR
J THERM ANAL	JOURNAL OF THERMAL ANALYSIS
J THERM BIOL	JOURNAL OF THERMAL BIOLOGY
J THORAC CARDIOV SUR	JOURNAL OF THORACIC AND CARDIOVASCULAR SURGERY
J THOUGHT	JOURNAL OF THOUGHT
J TOXICOL ENV HEALTH	JOURNAL OF TOXICOLOGY AND ENVIRONMENTAL HEALTH

ABBREVIATION	FULL TITLE
J TRANSP ECON POLICY	JOURNAL OF TRANSPORT ECONOMICS AND POLICY
J TRAUMA	JOURNAL OF TRAUMA
J TROP GEOGR	JOURNAL OF TROPICAL GEOGRAPHY
J TROP MED HYG	JOURNAL OF TROPICAL MEDICINE AND HYGIENE
